"All students must demonstrate the ability to read critically, write clearly, and speak fluently. To insure the success of this goal, all courses will require students to use the English language proficiently."

(This excerpt from the Board Credo, printed in full on page 3, states the theme each course listed in this guide strives to achieve.)
PLEASE NOTE: The courses listed in this Course Selection Guide are tentative and subject to sufficient enrollment and the availability of classroom space. Students and parents should not consider the provisions of this guide as an irrevocable contract between the student and the school. Thank you.

Statement of Non-Discrimination

It is the policy of the School District of Haverford Township not to discriminate on the basis of sex, handicap, race, color, age, or national origin in its educational and vocational programs, activities or employment as required by:

Title IX, which prohibits sexual discrimination; Section 504, which prohibits discrimination because of handicapped condition; and Title VI, which prohibits racial discrimination; and the Americans with Disabilities Act of 1990.

The School District of Haverford Township will take steps to assure that lack of English language skills will not be a barrier to admission and participation in all educational and vocational programs.

For information about this policy, please contact Dr. Maureen Reusche, Title IX Coordinator, or Dr. Valerie Burnett, Section 504 Coordinator, at 50 Eagle Road, Havertown, PA 19083 or telephone 610-853-5900.

INDEX OF COURSES 96
High School Credo  
School Board of Haverford Township

As a public comprehensive high school, Haverford High School is committed to the full maturation of all its students. Unlike other societal institutions, however, we have as our primary concern the development of our students' intellectual abilities. While the school's curriculum will focus on all aspects of human development necessary for mature adult living, a Haverford diploma will be meaningful and especially symbolic of academic proficiency, knowledge of the rights and duties of citizenship, and the ability to succeed in either higher education or productive employment. Our mission is to insure that all of our graduates achieve their full potential as persons competent to participate and interact intelligently in the complex and dynamic society of the 21st century.

To achieve this goal, we will require all students to master courses in the liberal and fine arts, in the natural and social sciences, and in mathematics and technology. Because the next generation will live in a global village, the national, international, and interdisciplinary dimensions of these studies will be emphasized, as will those communications skills necessary to live and work effectively with others. All students must demonstrate the ability to read critically, write clearly, and speak fluently. To insure the success of this goal, all courses will require students to use the English language proficiently.

A demanding core curriculum requires hard work on the part of the students, but we believe they will achieve as much as we expect of them. To set our expectations lower would be to do our students and our public a disservice. Because both students and the high school must be held accountable for what they do, assessment measures will be used on a regular basis to verify that our high expectations are being met.

A strong faculty is critical to the accomplishment of our purpose; therefore, Haverford is committed to recruit, employ, and nurture only the most qualified and talented professionals for teaching positions. First and foremost, our teachers must be enthusiastic about working with and educating adolescents and be experts in the fields they teach. They should know the various pedagogical strategies that produce effective instruction. As professional educators, they must work to continually renew themselves as persons, teachers, and scholars. Moreover, because complacency leads to mediocrity, the faculty will be encouraged to challenge the status quo; innovation and risk-taking will be supported, and doing things in demonstrably better ways will be rewarded.

Realizing also that the school will not be successful without the support of the family and the community, Haverford's mission will be disseminated broadly, and our parents and citizens will be encouraged to participate actively in the education of our youth. Indeed, we believe that a home environment supportive of educational excellence is essential to the realization of our mission, as is the continued philosophical and financial support of the community.

The support of parents and community must be matched by a commitment by our students to enhance the public welfare. Therefore, we will require that all students engage in some specific and meaningful service activities in which they can develop and demonstrate their concern for the common good. Such activities will promote the full maturity of students as persons who possess both rights and duties.

Finally, the high school must insure that each student is accorded the recognition and respect due all persons of intrinsic worth. Each must be known and cared for as an individual, and the rules and procedures governing the school must be just and administered equitably. We expect teachers, administrators, and all who work with our students to serve as role models, and as such to exhibit behavior consistent with the ideals of our democratic society.

The Board of School Directors will assure that Haverford High School is a learning community in which faculty and students exhibit mutual respect that is sustained by a supportive community. In their pursuit of truth and excellence, students and faculty will demonstrate pride in their work and a love of learning.

These beliefs shall be our guiding principles.
Course Selection Process

Students, their parents, counselors, and teachers should all be involved in the course selection process. Ultimately it is each student's responsibility to choose those courses which will best meet his or her own needs and interests. The choice should be a well-informed one, based on knowledge of the requirements for entrance into various occupations, colleges or technical schools. An ideal schedule should challenge but not overwhelm students leading them toward some occupational or educational goal. A careful reading of this guide is a good starting point. Further research and consultation with counselors, teachers, and other knowledgeable people may be necessary before students and their parents can make wise decisions. To choose a program which will interest you and fulfill your personal and academic needs, follow these steps:

- Become familiar with the requirements of the occupation, technical school, or college in which you are interested
- Become familiar with requirements for graduation from Haverford High School
- Listen and ask questions as your teachers discuss course selection in class
- See your guidance counselor if you need help. The choice of a proper schedule of studies lies with you and your parents

Curriculum

The Haverford curriculum is designed to accommodate a wide variety of students' needs. Certain graduation requirements (listed on page 7) must be met by all students. Every year, students have the opportunity to choose courses which best fit their needs. It's possible for Haverford students to select a very demanding college-preparatory curriculum giving them credit and/or advanced placement when they reach college. A vocational-technical education in more than 15 different fields is offered at the neighboring technical school. A student may graduate early, receive credit for independent study, or participate in our work study program. Many options, and combinations of options, are available for students.

Special Programs

Work Study Program

The Work Study Program gives students the opportunity to earn elective credits toward graduation by working at a part-time job. The student can receive a maximum of four (4) credits per year. Four hundred hours of work equals two (2) credits, 800 hours equals four (4) credits. The program is open to juniors and seniors who express an interest and need for this type of program. See the Work Study Coordinator, Mrs. Vindler, for more details and an application to enter this course, or call 610-853-5900 ext. 2572 for more information.

Delaware County Technical School

The Delaware County Technical School (DCTS) programs provide students with the opportunity to choose from over 20 different courses within the clusters of engineering and computer science; health and biosciences; construction technology; hospitality, tourism, and human services; and logistics, distribution, and transportation. DCTS campuses are located in Aston, Folcroft, and Broomall. DCTS students attend their technical programs for blocks one and two, and Haverford High School blocks three and four. Transportation is provided by the school district.
Students may enter this two-year program in the 11th grade. They receive four elective credits for their work at the technical school each year. Physical education and health are also offered at DCTS.

The DCTS programs give students an opportunity to gain knowledge and skills through career and technical training. This training can lead to employment or post-secondary education after graduation. Many technical students go on to further their education in college, technical schools or trade schools.

The Medical Careers program is an honors level, Delaware County Technical School program that is available for students in their senior year. It is geared toward students who might be interested in pursuing medical careers in college. In this program, the hospital becomes the classroom and students will travel to local hospitals and rotate through various departments. The curriculum includes anatomy, physiology, medical terminology, safety, infection control and legal/ethical issues. Students spend two class periods per week in clinical rotations shadowing and observing patient care and three days in classes.

The Medical Careers students leave Haverford High School at 6:30 every morning and travel to their assigned hospital. These students will not be scheduled for a first block class at HHS and will return to HHS during homeroom, at approximately 9:00 am. Students interested in participating in this program should contact their school counselor or speak with Mrs. Vindler in the guidance office for further information. Students can submit applications for this program in the spring term of their junior year.

Contact Mrs. Vindler for information (610) 853-5900, extension 2572.

**ESL (English as a Second Language)**

ESL offers direct language instruction as well as individual support for students whose first language is not English. Classes focus on all four modalities: listening, speaking, reading and writing. Enrollment in the ESL program is by the request of the student, parent, guidance counselor, or teacher, followed by placement testing and an interview. ESL course numbers:

</tbody>
</table>

**Foreign Exchange Program**

Students interested in a foreign exchange experience should contact the department chairperson of the World Language Department and their guidance counselor.

**Service Learning**

Service learning is an independent study, open to students in ALL levels, up to 2 credits, with a Pass/Fail grading system. Students learn by doing; hands-on experience can be the most powerful teaching tool in a school's arsenal. The purpose of this voluntary service learning program is to provide an opportunity for students to participate in a supervised service activity of their own choosing. Service Learning provides students with the opportunity to become responsible citizens by serving the needs of the community. It strengthens college, scholarship and job applications. Students can take Service Learning as many times as they would like during their school career.
Course outcomes and expectations are:

- Identify a community need and provide a service (A list of local agencies with volunteer programs is provided.)
- Perform a minimum of 30 hours of documented service at a time convenient to the student
- Maintain a journal including a log of hours
- Have periodic meetings with the program coordinator to reflect and report on experiences
- Complete a final report ~ a short written summary of volunteer experiences

In addition to the credit, students will also receive a letter from the district verifying the service, which may be included in college, scholarship, and job applications. Please see the Principal for information and the appropriate forms.

**Graduation Requirements**

Twenty-six and a half (26.5) credits are required for graduation.

Suggestions for Course Selection

1. Students planning to further their education

Educational institutions differ considerably in their admission requirements and students should be familiar with these requirements. Post high school information is available in the Counseling Office.

2. Generally acceptable college preparatory requirements

Many colleges require a minimum of 16-17 academic credits in the following subject areas: English, social studies, mathematics, science, and world language from ninth through twelfth grades.

a. Mathematics: The following mathematics courses must be scheduled and successfully completed to meet the minimum graduation requirements: Algebra I, Geometry, Algebra II, and Algebra III. The content of these courses includes the minimum high school mathematics required by most colleges. Students who plan to major in math, engineering, science, architecture, or possibly business administration should schedule math every year. Most students accepted by very competitive colleges elect advanced math and, frequently, Calculus.

b. Science: The following science courses must be scheduled and successfully completed to meet the minimum graduation requirements: Inquiry into the Physical Setting (IPS), Chemistry, and Biology. **Beginning with the Class of 2015, students will be required to complete 4 science courses.** Students interested in engineering, physical or biological sciences, or medicine should seriously consider taking one or more advanced courses after they have successfully completed the three required science courses.

c. World Languages: Colleges usually require at least two years of the same world language, or consider it an asset on a transcript. We recommend that students meet this requirement and even exceed it with a third and fourth year if they plan to apply to competitive colleges or wish to acquire a usable skill in the language.

3. The School Day

Haverford High School operates on a two-semester, four-block day. All students will be required to carry a minimum of 2 major one credit subjects per semester with a total of at least 6.5 credits for the year. Ninth and tenth grade students are not eligible for late arrival or early dismissal privileges.

4. Early Graduation

To graduate early a student must see his or her counselor and the building principal **one year prior to the anticipated graduation date.** For instance, arrangements for a January, 2015 graduation must be completed by June, 2014. Permission by the building principal is necessary. Diplomas are awarded only in June.

*(NOTE: Your counselor is a valuable resource and is available to help explain these various options.)*
**Grading System**

The giving of a "grade" or "mark" is the traditional method of evaluating a student's achievement. A mark is the teacher's best estimate of a pupil's accomplishment for a given period of time. No matter how objective or how scientific the methods may be, the teacher's judgment is always a factor in this task. We encourage students to constantly evaluate their own work. In Haverford, the marking system is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Scale</th>
<th>Unweighted Value</th>
<th>Weighted Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>98-100</td>
<td>A +</td>
<td>4.300</td>
<td>5.375</td>
</tr>
<tr>
<td>93-97</td>
<td>A</td>
<td>4.000</td>
<td>5.000</td>
</tr>
<tr>
<td>90-92</td>
<td>A -</td>
<td>3.700</td>
<td>4.625</td>
</tr>
<tr>
<td>88-89</td>
<td>B +</td>
<td>3.300</td>
<td>4.125</td>
</tr>
<tr>
<td>83-87</td>
<td>B</td>
<td>3.000</td>
<td>3.750</td>
</tr>
<tr>
<td>80-82</td>
<td>B -</td>
<td>2.700</td>
<td>3.375</td>
</tr>
<tr>
<td>78-79</td>
<td>C +</td>
<td>2.300</td>
<td>2.875</td>
</tr>
<tr>
<td>73-77</td>
<td>C</td>
<td>2.000</td>
<td>2.500</td>

<td>0.000</td>
<td>0.000</td>
</tr>
</tbody>
</table>

P = Pass (60-100)
WF = Withdrew Failing (Course Failure)
X = Medical Exclusion (Credit Earned)
I = Incomplete (No Credit)
WP = Withdrew Passing (No Credit)
Z = Audit (No Credit)

**Weighted GPA Policy**

1. Haverford High School will assign a weighting factor of 1.25, for weighted GPA purposes, to all approved AP and Honors courses.
2. In determining weighted GPA, the cumulative number of Quality Points earned by each student will be compared to all other students in that grade. Only courses of half-credit or more will be counted to a maximum of eight credits. Honors courses taken beyond this maximum will be reported on the student's transcript.
3. Quality Points are determined by first multiplying the value of the letter grade by the course credit and then by its weighted value.
4. The Class Profile represents the lowest to highest cumulative weighted GPA attained by the senior class. It is calculated at the end of eleventh grade and includes six semesters.

*Please note: Beginning on page 96, weighted courses are indicated by an asterisk (*)*
**Pass/Fail Grading System**

Students may take additional courses of study under a pass/fail grading system. Only students with more than six (6) major subjects are eligible to take a major course on a P/F basis and only one (1) course may be selected. All students may take one (1) minor course on a P/F basis. P/F grades will not be included in the determination of GPA, class rank or Honor Roll. In addition, students must identify that they are taking a subject Pass/ Fail no later than 3 weeks into the course. AP courses cannot be taken P/F. Courses that are part of a sequence, meaning they require a B or higher to go on to the next course, cannot be taken P/F if the expectation is to continue in the sequence.

Requests will be arranged on an individual basis and will require the approval of the department head, counselor, grade level principal and instructor.

**Independent Study**

Independent Study is a privilege which is granted to students on an individual basis to fill a study hall. Students' requests require the written approval of the instructor, the counselor, the department supervisor and the building principal. Independent Study courses are always graded Pass or Fail.

**Summer School**

A student who fails a course may satisfy the requirement by repeating the course in Haverford's summer school or an accredited summer school that has been approved, in advance, by the principal. Failing grades are not removed from a student's record. The summer school grade is recorded and included with the other grades. The number and variety of courses offered during Haverford High School’s Summer School are subject to student demand. Therefore, the likelihood of a particular course being offered in any given year is unpredictable.

**Additional Guidelines**

Generally, courses may be scheduled more than one time for such reasons as improving the final grade. The new grade would count along with the old grade, but no additional credit will be awarded for re-taking a course.

*Exceptions to the above are the following courses that may be taken more than one time for credit:*

- Advanced Computer Aided Drafting & Design
- Advanced Studio Theater
- Architectural Computer Aided Drafting
- Contemporary Sewing & Crafts
- Creative Writing I
- Digital Recording II
- Fitness/Weight Training
- General Physical Education
- Introduction to Cabinet & Furniture Making
- Introduction to Manufacturing Technology
- Introduction to Practical Woodworking
- Introduction to Programming for IOS
- Lifetime Fitness
- Physical Education Major

*None of these courses may be taken more than *twice* over your high school career for credit.*
Key Terms in Course Selection

Year/Semester/Quarter ~ Course descriptions contain information regarding the length of classes. Classes can be a full year (two credits), one semester (one credit), or one quarter (.5 credit) in duration. As described in the following pages, some courses are only offered during certain terms in the academic year; all others may be held in any term depending on student requests and staffing needs.

Levels ~ In some courses, level designations are identified to assist you in selecting a program which will match your interests and abilities. Levels help you to determine the differences among courses in terms of time required, effort needed, and performance and skills expected. Generally, the last digit of the course number identifies the level of the course.

AP ~ The AP Program currently offers more than 30 courses across multiple subject areas. Each course is developed by a committee composed of college faculty and AP teachers, and covers the breadth of information, skills, and assignments found in the corresponding college course. AP course offered at Haverford will include the name AP in the course name. Similar to Honors courses, AP courses require the highest level of commitment, motivation and effort by the student. Students will sustain high levels of thinking and problem-solving skills as well as writing and speaking in an insightful, mature, and competent manner. These courses require students to have the ability to absorb material quickly, be responsible for maintaining academic standing, and to work independently, as well as cooperatively. Course outcomes should be of superior quality.

Honors ~ Designated in the course name with an (H), Honors courses require the highest level of commitment, motivation and effort by the student. Students will sustain high levels of thinking and problem-solving skills as well as writing and speaking in an insightful, mature, and competent manner. These courses require students to have the ability to absorb material quickly, be responsible for maintaining academic standing, and to work independently, as well as cooperatively. Course outcomes should be of superior quality. Course numbers ending in the number 1 are Honors courses.

College Prep ~ College preparatory courses demand that students read and write with relative ease and in a competent manner. College Prep courses require individual presentations as well as cooperation in group participation. These courses also require that students have effective study habits and the ability to conscientiously complete assignments. Course numbers ending in the number 2 are College Prep courses.

Career Track ~ Career track courses effectively prepare students for employment, higher education or training after high school. These courses focus on providing the verbal, writing, mathematics, communications and citizenship skills necessary for students to become well informed, productive and satisfied adults. These courses require the following: Completion of assignments and adherence to classroom procedures such as, practicing self-discipline and proper attendance. Course numbers ending in the number 3 are Career Track courses.

Unleveled ~ Unleveled courses are designed to offer educational opportunities to students of all abilities. Course numbers ending in the number 0 are Unleveled courses.
Dual Enrollment Agreement with DCCC

HHS has entered into a Dual Enrollment agreement with Delaware County Community College for eligible students to earn college credits at a fraction of the cost of standard tuition rates, while still attending the high school. Please read carefully:

- Many Haverford juniors and seniors are on track to complete their required courses/graduation credits prior to their expected graduation date. Increasingly, high schools have been exploring Dual Enrollment agreements with local colleges that permit their students to both try out college courses to determine whether or not this is the right path for them, and/or earn college credits during their high school career, in such courses as College English, College Mathematics, Psychology, Sociology and others.

- Dual Enrollment programs also encourage more students to continue education beyond high school, and improve student success in the transition from secondary to post-secondary education.

- The credits you earn through the Dual Enrollment program can be transferred directly into one of the College’s associate degree programs. The College offers more than 60 degree programs and has transfer agreements with more than 40 colleges and universities.

- HHS students would be responsible for all transportation, tuition and fees. Courses will be offered at DCCC’s Main Campus on Media Line Rd. Students are responsible for purchasing their own books and supplies.

- All DCCC services would be available to students: Library, Career Counseling, Computer Labs, etc.

- Eligible students would be those who are on track to complete all core required classes for graduation, are students “in good standing,” and have successfully completed all application steps for Delaware County Community College's Dual Enrollment program. After acceptance, students will need to take the College's Accuplacer test or submit qualifying SAT or ACT test scores to waive the Accuplacer test.

- Participants are selected by the College on demonstrated academic ability and motivation. Accepted students in grades 9-12 can earn up to 21 transferable college credits at almost 70% off the regularly priced tuition.

- For Questions or further information please email ENROLL@DCCC.EDU or call 610-359-5141 to reach a Delaware County Community College Dual Enrollment advisor.

- Please discuss your enrollment plans with your counselor, who can answer any questions you may have.

As part of the College’s pilot program, students will save significantly on tuition costs. Students from sponsoring school districts will pay just $40 per credit. This is almost a 70 percent discount on the College’s standard tuition rate.

Cost of a Three-Credit Class: Regular Tuition vs. High School Dual Enrollment

<table>

**Enhance your college application.**

Today, entrance into college is more competitive than ever. Earning college credit while you’re still in high school will help make your application stand out. It not only shows that you are a dedicated, committed student, but it also proves that you are ready to succeed at the college level.

**What is the process for enrolling?**

**Step 1. Gather and complete all necessary paperwork**
- Signed Dual Enrollment Pilot program agreement form (http://www.dccc.edu/sites/default/files/marketing/Dual%20Enrollment%20Agreement%20Form.pdf)
- Official high school transcripts

**Step 2. Discuss course options and get approval from your high school**

**Step 3. Send all materials to:**

Delaware County Community College  
Attention: Admissions Office – Dual Enrollment Pilot  
901 South Media Line Road  
Media, PA 19063

*The deadline to apply is August 1 for Fall, December 1 for Spring, May 1 for the Summer I, and June 1 for Summer II.*

**Step 4. Await decision from Dual Enrollment Committee**

Your application will be reviewed by the Dual Enrollment Admissions Committee. You will be notified by mail whether you’re application was approved or not. If you are not approved, we encourage you to keep working hard in your high school courses and reapply for a future term.

**Step 5. Schedule your placement test**

Accepted students will receive instructions on scheduling their placement test. You must complete the College’s entire placement test, covering reading comprehension, math and a writing sample. The “green ticket” (included with your acceptance letter) and a photo ID are required to take the test. Visit (www.collegeboard.com/student/testing/accuplacer/ preparation-sample.html)

We hope you take advantage of this exciting program!
A new program in computer aided drafting has been created for high school students by DCCC. Students enrolled in this program would leave Haverford High School after 3rd block on transportation provided by the district. They would attend classes at DCCC until 2:30 p.m. and then return to the high school. Each of the three courses in the certificate program would earn three college credits, for a total of nine credits. The cost of the classes would be borne by the district. Students interested in participating in this program should contact their school counselor for further information.

**New DCCC Program beginning September 2016**

**COMPUTER AIDED DRAFTING, Certificate of Competency**

*Program of Study Attributes:*

In this program, students will learn to manage computer systems for drawing production, information storage, retrieval and communication in the engineering and design workplace. As they develop computer aided drafting skills, they will explore manufacturing, mechanical, and architectural engineering and construction applications.

This program is intended, primarily, to serve as computer training for individuals who have previous experience as manual "board" drafters and who already possess a working knowledge of technical drawings. However, though there is no requirement of prior technical experience, individuals desiring an elementary introduction to the fields of engineering drafting, and design will be well served by this curriculum.

All credits earned in this certificate are applicable to the Associate of Applied Science Degree in Advanced Technology

Upon successful completion of this program, students should be able to:

- Create two- and three-dimensional technical design models and drawings to document solutions for defined customer problems.
- Use CAD tools in applying the principles of descriptive geometry and the techniques of graphic construction to the process of documenting design intent.
- Execute computer generated plane and 3D geometric forms, as well as object viewing techniques, to describe and present a design concept.
- Apply CAD tools and techniques in the execution of working, multiview, assembly and 3D model drawings.

**TCC 112 - CADD Graphics**

Mon, Tues, Wed, Thurs, Friday; 1:00 PM – 2:30 PM
September 6, 2016 - November 4, 2016

*Course Description*

This course provides students with the concepts and skills necessary to form the basis of object visualization and documentation inherent to the creation and conveying of technical designs and drawings. Appropriate drafting concepts and skills are developed through use of both free-hand sketching and computer-assisted drafting. Instruction in the use of CADD systems is integrated with graphic theory throughout the course. The course covers theoretical and applied drafting concepts appropriate for conveying graphical representation of objects and designs in a variety of technical environments including manufacturing and construction, as well as architectural, mechanical and civil engineering design. Upon successful completion of this course, students should be able to: Demonstrate the principles governing the setup and layout of technical drawings. Discuss the geometric terms and principles used to define, design and represent drawing objects and entities.

Apply geometric construction techniques and principles of orthographic and pictorial projection for the representation of basic objects. Perform basic annotation operations. Apply acceptable forms of linework and text in both freehand sketching and CADD. Demonstrate the use of basic office equipment, including computer information systems, for creating, managing, plotting and reproducing technical drawings.
Credit Hours: 3

TCC 121 - Project Management Processes
Mon, Tues, Wed, Thurs, Friday; 1:00 PM – 2:30 PM
January 2017 – March 2017

Course Description
This course is a general survey of time/event and resource management principles. Time management, group dynamics, operations management and project management are covered. Project management can be applied to fields of engineering, architecture, construction, manufacturing, service occupations and others.

Upon successful completion of this course, students should be able to:
- Develop a process based rationale for approaching project management
- Develop a process for defining project objectives and goals
- Identify substantive data upon that decisions can be made in the process of managing a project
- Ascertain the elements and methods essential for process/project management systems
- Prepare schedule updates and conduct resource capacity analysis
- Select the method of solution most appropriate for a particular problem
- Utilize personal computer (PC)-based software programs to compile data, generate documentation, prepare graphical representation, perform analyses and conduct simulations
- Perform network analyses
- Make operational decisions in connection with a particular management system
- Use exercises and case studies for examining project management problems, for developing solutions to problems and for service testing ideas, plans and methods

Credit Hours: 3

TCC 122 - 2-D CADD
Mon, Tues, Wed, Thurs, Friday; 1:00 PM – 2:30 PM
March 2017 – June 2017

Course Description
This is a course in computer-aided design and drafting using two-dimensional orthographic projection drawing techniques. Emphasis is placed on sketching/layout techniques for personal-computer-based CADD system operations. A series of increasingly difficult drafting assignments, ending with presentation-quality CADD drawings will be the major outcome of the course.

Upon successful completion of this course, students should be able to:
- Use appropriate sketching techniques to lay out a drawing, establish drawing parameters, determine set-up criteria and represent the conceptual aspects of views for a two-dimensional drawing
- Use various input devices, display, drawing and plotter commands to satisfy the specific requirements for completing drawings for both the mechanical and construction industries
- Modify and correct redlined orthographic drawings, using Inquiry and Edit commands available in the CADD software
- Provide annotation, in the form of standardized dimensions, notes, bill of materials, tabulation tables and other text on drawings
- Develop, structure and manage related drawing files and previously prepared drawings to associate desired information and entities for the creation of a specific set of final drawings
- Apply basic through intermediate techniques of drawing composition and development for plotting scaled views in various viewport configurations
- Create two-dimensional engineering charts, graphs and tables
- Develop User Coordinate Systems to facilitate drafting of intermediate through advanced drawing views to include orthographic, axonometric and auxiliary planar views

Credit Hours: 3

Course Prerequisites: TCC 112
Schedule Changes

The master schedule and the assignment of faculty are based on students' course selections made each spring. Students are encouraged to make serious selections based on careful deliberation ensuring achievement of their goals.

Schedule changes will only be made under the following conditions:

1. A student who attends summer school will be permitted to change courses related to those taken in summer school.

2. A student may change the level of a course with the recommendation of the current teacher, approval of the administrator for the department and the grade level administrator. Parental approval is also necessary. Changes must be completed by the end of the 4th week of a course.

3. A student may add a course during the first five days of a semester course (the first three days of a quarter course); any added course must fit into an open or free period. It is not possible to DROP a course and then ADD another course. Changes based on teacher preference, lunch period, and the like will not be entertained.

Other special circumstances:

- Because of an error, a student is scheduled for a course that she/he did not request; or for which the student did not take or pass the prerequisite.

- By teacher recommendation, after parent consultation, based on student performance in the class during the first grading period. Administrative approval is needed.

Our staffing is based on student selection. The district attempts to give students every reasonable assurance that the courses they choose and need will be run. Therefore, schedules will not be adjusted except for extraordinary reasons once the school year begins. This includes the dropping of scheduled classes for seniors after college acceptance.
New Courses

The following course has become a semester long, 11th grade course:

Advanced Placement English Language and Composition – EN04201 – 1 credit, semester course, AP level. This AP course fulfills the 11th grade English requirement. This course prepares students for the Advanced Placement examination in English Language and Composition. This course prepares students to score high on the Advanced Placement exam in Language and Composition, which is administered in the spring. The course stresses close reading strategies, concise academic writing, and student-initiated discussion. Students will closely consider how authors construct meaning through their syntactical choices and organizational decisions. Speeches, newspaper articles, memoirs, essays, and literary criticism make up the reading list. Students will also consider the media that surrounds them whether spoken or displayed. Underlying each unit is the attention to close reading, author’s purpose, the needs of an audience, the demands of the subject, rhetorical strategies, and the resources of language: syntax, word choice, and tone. Writing assignments include essays that call for synthesis, analysis, and argument on specific topics. Assessments are consistent with methods used on the Advanced Placement exam, which is taken in the spring. As a college-level course, the performance expectation for written work and class participation is high and the workload is challenging. IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.

Full description can be found on page 25.

The following course has changed to year-long status:

Advanced Placement English Literature and Composition – EN04101 – 2 credit, year-long course, AP level. This AP course fulfills the 12th grade English requirement. This course integrates art, philosophy, and history into an intensive study of Western literature from ancient Greece to the present. This course prepares students for the Advanced Placement examinations in English Language and Composition, which is administered in the spring, as well as the rigors of college liberal arts courses. The course is chronological and includes units on the literature of ancient Greece (The Odyssey, Oedipus Rex), the Middle Ages (The Canterbury Tales, Sir Gawain and the Green Knight, The Devine Comedy), Shakespeare, the 17th century (Donne, the Cavaliers, and the Puritans), the 18th century (Candide, Gulliver’s Travels), the Romantic period (Frankenstein and Romantic poetry), the Victorian era (Jane Eyre and selected novels), and the modern era (Heart of Darkness and 1984). IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.

Full description can be found on page 27.
Business Education Department

The business department strives to prepare students for the variety of careers and opportunities in today's global economy. The course offerings are designed to meet the current needs of American business as outlined by the SCANS report. Reading, writing and math skills will be integrated and reinforced throughout all course offerings. Additionally, awareness will be raised in the following areas: soft skills, critical thinking, problem solving, team building, business ethics, decision making, and technology.

Students can earn membership in the Haverford Chapter of the National Business Honor Society. This is based upon your status as a Junior or Senior, having completed at least 3 business education courses, and earning a GPA average of at least 3.5 in the business electives and an overall GPA average of 3.0. The objectives of the National Business Honor Society include: promoting and recognizing academic achievement in business education, fostering and recognizing leadership skills and character development, and helping members grow ethically and socially by promoting and encouraging an interest in business. The four cornerstones of the National Honor Business Society are: Scholarship, Leadership, Service, and Character.

**Accounting I – BU01100** – 1 credit, one semester course, **unleveled**. Open to all grades. **No prerequisite.** This course is a must for any student who is interested in a business career. As future employees, managers, and entrepreneurs, students who understand basic accounting principles will be better able to manage their personal and companies’ financial resources. This course will take students through a full accounting cycle by teaching them how to journalize business transactions and complete and analyze financial statements. Accounting I objectives also include an understanding of the industry, career options, accounting as a college major and general business success skills. An understanding of accounting will be invaluable, no matter what job you hold or in what organization you work.

**Accounting II – BU01200** – 1 credit, one semester course, **unleveled**. Open to all grades. **Prerequisite:** Completion of Accounting I with a "C" or better. This course integrates accounting practices with the Quickbooks automated accounting software. Business simulations and case studies are often used throughout the course to imitate real world experiences. Throughout this course, students will learn how to calculate asset depreciation, keep track of inventory in a merchandising business, and account for non-collectibles. Students will also learn about internal controls and ways to prevent fraud in the business world.

**Business Law – BU01300** – 1 credit, one semester course, **unleveled**. Open to grades 10, 11 and 12. **No Prerequisite.** Using a case-study approach, this course will introduce students to the basics of business law through a focus on contract law, consumer law, employment law and business legal structures. Students will demonstrate an understanding of the nature of contractual relationships, legally binding contracts, consumer protection legislation, employer-employee relationships, and legal responsibilities associated with sole proprietorships, partnerships and corporations. This project-based course will include, but is not limited to, team-oriented debates, case studies, and real-life simulations that will culminate with full class participation in a role-assigned mock-trial.

Knowledge of business law is useful for all students because they will eventually assume roles as citizens, workers, and consumers in their communities and society at large.
Computer Applications 1 – BU01400 – 1 credit, one semester course, unleveled. Open to all grades. No prerequisite. In the modern workplace, computer skills are indispensable and MS Office Suite 2010® will help students develop the skills necessary for success. Students will learn about the full capabilities of MS PowerPoint®, MS Word and MS Excel®. We will also be using Google Drive extensively and additional topics pertinent to Internet use will be discussed at length. These topics will include but are not limited to: Internet Safety, Cyber bullying, Identity Theft, Online predators, Viruses and Virus Protection, Social Networks for Business (Facebook, Twitter, etc.). Time permitting we also briefly look at editing video using WeVideo. 

Web Communications and Design – BU01500 – 1 credit, one semester course, unleveled. Open to all grades. No prerequisite. This course is designed for the introductory to intermediate level student. No prior web design experience is required. The course is project-based and will enable students to create high quality web sites using the industry leading WordPress and PhotoShop software. In addition to building websites, students will cover related topics such as using Social Media for Business (Facebook, Twitter, YouTube), Search Engine Optimization; E-Mail Marketing and managing Pay Per Click campaigns on search engines.

Course expectations and outcomes are:

- Students will become proficient in WordPress for Web Design
- Students will become proficient in PhotoShop for site graphics.
- Students will build and publish their own websites using the same tools and methods used by industry professionals.
- Students will become proficient in planning and production, including design of graphics; site navigation; color schemes; functionality and user experience.
- Students will be introduced to online advertising campaigns using Facebook, Google and E-mail Marketing.

Entrepreneurship – BU03000 – .5 credits, one quarter course, unleveled. Open to all grades. No prerequisite. Small businesses are the backbone of any economy. Whether you want to be the next Bill Gates, open a small local shop, or just understand how to plan, launch and run your own business, this course is for you. In this course you will learn what it takes to be an Entrepreneur, and you will create a standard business startup plan and marketing materials. This course will integrate business concepts, entrepreneurial activity, and computer technology. All students will learn how to recognize a business opportunity, and then develop a comprehensive business plan to learn how to operate and maintain the business. In the real world, new small businesses usually need startup capital. To get this money they must present their business plan to a bank. Our students will make their presentation to the class / teacher, including the financial section of the business plan, and a written submission. To perform these tasks students will utilize available technology such as the MS Office suite, Web 2.0 tools or a range of options from Google Drive.

Course Expectations and Outcomes:

- Students will create a business plan
- Students will present the plan to the class / teacher using MS PowerPoint®
- Students will understand financial statements such as Cash Flow Forecasts and Income Statements
- Students will create data based projections such as sales, cost of goods sold, projected profits
- Create business documents using Word, Excel, PowerPoint and Publisher
Business

Marketing – BU03100 – .5 credits, one quarter course, un leveled. Open to all grades. No prerequisite. Do you wonder why Coke is more popular than Acme soda? Why Uggs and Northface Jackets have become such popular items for young adults? Marketing directly impacts our buying decisions. This course will give you a clear understanding of what marketing is, and how it influences you. You will learn about advertising, and appreciate the skill and planning that goes into the creation of an effective marketing campaign. We will look at major brands and study why they are so successful.

This course has been developed to help you learn about marketing and develop marketing skills. Marketing is one of the largest and most exciting career areas in business and there are many career opportunities in this field. An understanding of marketing is very useful, no matter what job you hold or in what organization you work. During the course students will select and use appropriate technology such as the MS Office suite, Web 2.0 tools or a range of options from Google Drive.

Course Expectations and Outcomes are:

- Learn the processes involved in transferring business products or services to a consumer
- Analyze the impact of marketing activities on the individual, business, and society
- Analyze the characteristics, motivations, and behaviors of consumers
- Analyze the role of marketing research in decision making
- Describe the elements, design, and purposes of a marketing plan
- Create a marketing plan

Computer Applications 2 – BU03200 – .5 credits, one quarter course, un leveled. Open to all grades. Prerequisite: Completion of Microsoft Office 1 with a "B-" or better. This course builds on the work completed in MS Office 1. We will look further into the advanced features of MS Word®, Excel® and PowerPoint. This course will assist students in preparing for the MOS (Microsoft Office Specialist) exam in each of the three software packages (Word, Excel and PowerPoint). Please note that the MOS exams are optional and will not affect class grades. There is a separate exam fee for each software program should the student elect to take the Specialist exam.

Personal Finance – BU03300 – .5 credits, one quarter course, un leveled. Open to all grades. No prerequisites. Would you like to become a millionaire? Reaching this accomplishment can only come through making well-informed personal financial decisions. This class is designed to be a practical guide for learning how to make those decisions correctly. Throughout this 9 week course, you will be taken through a financial lifecycle – teaching you the process of making smart financial decisions that everyone faces throughout their life. Topics covered will include: exploring college and career options, understanding taxes and deductions from your paycheck, using practical banking and investment practices, establishing credit and managing debt, financing major purchases (car, house), budgeting, household insurance requirements and retirement planning. Throughout the course you will also learn how to utilize online financial calculators to help you with the cost analysis of the above concepts. Money management is an acquired skill. Don’t let the opportunity to learn it pass you by!
**Advanced Marketing- BU03400 - .5 credits**, one quarter course, *unleveled*. Open to all grades.  
**Prerequisite: Marketing 1.** The introductory course covered all the basics about defining markets, manipulating the 4 Ps to reach those markets, and making money. In this course we will delve deeper into marketing by examining how things work in different market areas including sports, entertainment, charity, fashion, tourism, movies, and international marketing. All these sectors use basic marketing principles but they manipulate them in different ways. Studying the importance of social media and the internet is crucial as all marketing today relies heavily on these tools. This course has been developed to help you learn more about marketing and further develop your marketing skills and instincts. Marketing is one of the largest and most exciting career areas in business and there are many career opportunities in this field. An understanding of marketing is very useful, no matter what job you hold or in what organization you work. During the course students will select and use appropriate technology such as the MS Office suite, Web 2.0 tools or a range of options from Google Drive.
English Department

A student must pass, beginning with ninth grade, the required English course at that grade level before moving on to the next required English course. Within one school year, a student may take only one required English course.

Freshman English Courses

English 9 (H) – EN01001 – 1 credit, one semester course, honors level. This course focuses on the thematic study of literature, the development of writing and speaking skills, and the strengthening of vocabulary. IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE. Requisite: Must also be enrolled in SS01001, Western Civilization (H).

Course expectations and outcomes:
- Write demonstrating an understanding of correct sentence structure, mechanics, and usage
- Critically analyze works of drama, fiction, non-fiction, and poetry
- Learn and apply the essentials of research
- Use technology in all aspects of learning
- Write a thesis-based research report

Selected texts: In addition to required readings, students read several books of their own choosing. Readings include: Antigone, Romeo and Juliet, and selected short stories, non-fiction, and poetry.

English 9 (A) – EN01002 – 1 credit, one semester course, college prep level. This course focuses on the thematic study of literature, the development of writing and speaking skills, and the strengthening of vocabulary. IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “C” OR BETTER TO REMAIN IN AN ACADEMIC COURSE. Requisite: Must also be enrolled in SS01002, Western Civilization.

Course expectations and outcomes:
- Write demonstrating an understanding of correct sentence structure, mechanics, and usage
- Analyze works of drama, fiction, non-fiction, and poetry
- Learn and apply the essentials of research
- Use technology in all aspects of learning
- Write a thesis-based research report

Selected Texts: Students will read at least one book of their own choosing in addition to the required reading for the course. Readings may include: Romeo and Juliet, and selected short story, non-fiction, and poetry pieces.

 *********************************************

Sophomore English Courses

English 10 (H) – EN02001 – 1 credit, one semester course, honors level. This course is designed to challenge the most capable language arts students and to develop critical and analytical readers, writers, thinkers, and speakers. The course emphasizes the individual as a proactive and responsible reader and thinker. The course includes an intensive study of grammar. IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.
Course expectations and outcomes:
- Thoughtful reading that reveals thematic understanding of select pieces of world literature written across the centuries
- Insightful discussion, thinking, speaking, and listening, that reveals the connections between literary works and writers' purposes in selected passages of literature
- Write compositions demonstrating an understanding of correct sentence structure, mechanics and usage. Several formal compositions will be required per semester
- Expository writing assignments, particularly persuasive essays and literary analyses, which demonstrate a student's ability to create, interpret, analyze, support, evaluate, and/or defend the universality of thematic ideas present in a literary work
- One library-based research report (in both oral and written forms) related directly to course topics or issues
- An individual and group presentation linking the literature of a specific time period to an awareness of the historical and cultural developments of the day
- Read for understanding and interpretation of works of drama, fiction and poetry
- Learn and apply the essentials of research
- Develop vocabulary skills in conjunction with reading and writing assignments

Selected Texts: In addition to the required readings, students read books and materials of their own choosing in connection with required research projects and presentations. Required selections include: Night, The Kite Runner, and Balzac and the Little Chinese Seamstress, in addition to selections from the Reading the World anthology and a self-selected non-western memoir or novel.

**English 10 – EN02002** – 1 credit, one semester course, college prep level. This course provides thorough academic preparation through the thematic study of literature. This course emphasizes reading, writing, public speaking skills, vocabulary development, and grammar. **IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “C” OR BETTER TO REMAIN IN A COLLEGE PREP COURSE.**

Course expectations and outcomes:
- Write compositions demonstrating an understanding of correct sentence structure, mechanics and usage. Several formal compositions will be required per semester
- Develop an ability to create expository writing assignments, particularly persuasive essays and literary analyses
- One library-based research report (in both oral and written forms) related directly to course topics or issues
- An individual and group presentation linking the literature of a specific time period to an awareness of the historical and cultural developments of the day
- Read for understanding and interpretation of works of drama, fiction and poetry
- Learn and apply the essentials of research
- Develop vocabulary skills in conjunction with reading and writing assignments
Selected Texts: In addition to the many required readings, students read books and materials of their own choosing in connection with required research projects and presentations.

English 10 – EN02003 – 1 credit, one semester course, career track level. This course emphasizes the reading, writing, speaking, and listening skills essential for success in school and real-life situations. Students will read books and short stories of their own choosing in addition to the required course readings.

******************************************************************************

Junior English Courses

English 11 – EN03000 – 1 credit, one semester course, unlevelled. This state-mandated course is for students who scored Basic or Below Basic on the Keystone Exam in Literature. The course emphasizes reading comprehension, analytical writing, vocabulary, and grammar. Students will retake the Keystone English Literature Exam at the completion of the course. Enrollment in the course is mandatory for those students who were not proficient on the Keystone Literature Exam.

English 11 (H) – EN03001 – 1 credit, one semester course, honors level. Honors American Literature is a novel-based course focused on various contemporary periods from the 19th through the 21st centuries. Students will analyze novels and plays within historical and contemporary contexts. The course is designed to prepare students for college-level expectations. The development of critical thinking and writing skills will also be a major focus throughout the semester. Novel-based units may be supplemented with a variety of selected poems, short stories, and non-fiction articles to provide a wide view of the ever-changing American perspective.

IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.

Course expectations and outcomes:

- Read and interpret literary and critical texts
- Analysis and discussion that reveals connections between literary works and writers' purposes about selected passage of literature
- Write persuasively to create, interpret, analyze, support, evaluate, and/or defend the universality of thematic ideas present in a literary work with regard to the Keystone Rubrics and AP Writing Rubric.
- Participate in discussions, debates, and group research projects on key events and literary works
- Analyze selected American historical issues, problems and situations, especially with regard to important works of American literature

Selected Texts: The required readings may include: The Road; The Great Gatsby; Breath, Eyes, Memory; The Roundhouse; Flight Behavior; No Easy Day; The Yellow Birds; The Things They Carried; Their Eyes Were Watching God; and Slaughterhouse Five.

English 11 – EN03002 – 1 credit, one semester course, college prep level. American Literature is a novel-based course focused on various contemporary periods. Students will analyze novels within historical and contemporary contexts. The course is designed to prepare students for college-level expectations; the development of critical thinking and writing skills will also be a major focus throughout the semester. Novel-based units may be supplemented with a variety of selected plays, poems, short stories, and non-fiction articles to provide a wide view of the ever-changing American perspective.

IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “C” OR BETTER TO REMAIN IN A COLLEGE PREP COURSE.
Course expectations and outcomes:

- Read and interpret literary and critical texts
- Discussion and analysis that reveals connections between literary works and writers’ purposes about selected passage of literature
- Write persuasively to create, interpret, analyze, support, evaluate, and/or defend the universality of thematic ideas present in a literary work
- Participate in discussions, debates, and group research projects on key events and literary works
- Analyze selected American historical issues, problems and situations, especially with regard to important works of American literature

**Selected Texts:** *The Great Gatsby, Of Mice and Men, The Road, The Things They Carried, No Easy Day, The Yellow Birds* as well as a variety of nonfiction, short stories, poetry, and excerpts from teacher-selected American novels.

**Advanced Placement English Language and Composition** – EN04201 – 1 credit, semester course, AP level. This AP course is available to be taken to fulfill the 11th grade English requirement. This course prepares students for the Advanced Placement examination in English Language and Composition. This course prepares students to score high on the Advanced Placement exam in Language and Composition, which is administered in the spring. The course stresses close reading strategies, concise academic writing, and student-initiated discussion. Students will closely consider how authors construct meaning through their syntactical choices and organizational decisions. Speeches, newspaper articles, memoirs, essays, and literary criticism make up the reading list. Students will also consider the media that surrounds them whether spoken or displayed. Underlying each unit is the attention to close reading, author’s purpose, the needs of an audience, the demands of the subject, rhetorical strategies, and the resources of language: syntax, word choice, and tone. Writing assignments include essays that call for synthesis, analysis, and argument on specific topics. Assessments are consistent with methods used on the Advanced Placement exam, which is taken in the spring. As a college-level course, the performance expectation for written work and class participation is high and the workload is challenging. **IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.**

Course expectations and outcomes:

- Students will apply accepted critical strategies to complex, challenging texts
- Students will write clearly and logically as described in the Advanced Placement writing rubric
  - Writing assignments include research and evidence-based arguments, rhetorical analyses, and persuasive essays
- Students will develop provocative and original readings of texts through close reading
- Students will become lifelong readers
- Students will participate in small group and independent projects

******************************************************************************
Senior English Courses

**English 12 (H) – [EN04001] – 1 credit, one semester course, honors level.** This course is designed for students who are preparing for the rigor of college reading and writing. Through the close reading of imaginative literature and non-fiction from the Western canon, students deepen their understanding of the ways authors use language to provide meaning and pleasure for their readers. As they read core texts such as *Macbeth* and *Lord of the Flies*, students develop critical thinking skills, critical writing skills, and general writing skills as they consider a work's literary devices, such as tone, metaphor, irony, structure, character, style, and theme. Students completing this course will become skilled readers of prose in a variety of rhetorical contexts. **IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.**

Course expectations and outcomes:

- Students will apply accepted critical strategies to complex, challenging texts
- Students will write clearly and logically as described in the Literary Analysis writing rubric
- Students will develop provocative and original readings of texts
- Students will become life-long readers
- Frequent writing assignments
- Small group and independent projects

**English 12 – EN04002 – 1 credit, one semester course, college prep level.** This course includes a thematic study of literature and the development of writing and speaking skills. **IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “C” OR BETTER TO REMAIN IN A COLLEGE PREP COURSE.**

Course expectations and outcomes:

- Employ basic techniques of literary criticism to make defensible and plausible interpretations of a text
- Analyze literary texts
- Use a thematic approach to discuss, analyze, and interpret literature
- Write college-level essays
- Review the grammatical and organizational skills necessary to write effectively and well
- Use public speaking skills in groups and in class discussions

**Selected texts:** Required readings include *Macbeth* and *Lord of the Flies*.

**English 12 – EN04003 – 1 credit, one semester course, career track level.** This course includes a thematic study of world literature and the development of writing and speaking skills.

Course expectations and outcomes:

- Clear, precise writing in a variety of modes, especially the persuasive and expository
- Read works of drama, fiction and poetry for understanding
- Learn and apply the essentials of research
- Develop vocabulary skills in conjunction with reading/writing assignments
- Develop research and oral presentation skills

**Selected texts:** Required readings include *Macbeth* and *Lord of the Flies*. 
Advanced Placement English Literature and Composition – EN04101 – 2 credit, year-long course, AP level. This 12th grade course fulfills the requirement for 12th grade English. This course integrates art, philosophy, and history into an intensive study of Western literature from ancient Greece to the present. This course prepares students for the Advanced Placement examinations in English Language and Composition, which is administered in the spring, as well as the rigors of college liberal arts courses. The course is chronological and includes units on the literature of ancient Greece (The Odyssey, Oedipus Rex), the Middle Ages (The Canterbury Tales, Sir Gawain and the Green Knight, The Divine Comedy), Shakespeare, the 17th century (Donne, the Cavaliers, and the Puritans), the 18th century (Candide, Gulliver’s Travels), the Romantic period (Frankenstein and Romantic poetry), the Victorian era (Jane Eyre and selected novels), and the modern era (Heart of Darkness and 1984). IT IS RECOMMENDED THAT A STUDENT MAINTAIN A GRADE OF “B” OR BETTER TO REMAIN IN AN HONORS COURSE.

Course expectations and outcomes:

- Students will develop an understanding of the history of Western thought and the central problems and controversies that inspired those ideas
- Students will develop an understanding of how different disciplines are related and how these disciplines enrich each other
- Students will apply accepted critical strategies to complex, challenging texts
- Students will write clearly and logically as described in the Advanced placement writing rubric
- Students will develop provocative and original reading of texts
- Students will become life-long readers

*****************************************************************************

ELECTIVE ENGLISH COURSES

Studio Theater – EN05000 - .5 credits, one quarter course, unlevelled. Open to all grades. No prerequisites. Students study drama as an interpretive art form.

Course expectations and outcomes:

- Perform monologues, improvisations, and acting exercises to aid students in understanding the stage craft techniques used by both playwrights and actors
- Study full-length and one-act plays - both classic and modern. Plays are studied from the standpoints of performance, production, character, and theme analysis
- Analyze and perform scenes and one-act plays of student's own selection and from the English curriculum
- Present scenes demonstrating a knowledge of all aspects of dramatic production including acting, dialogue, staging, set design, and theme presentation
- Complete drama writing assignments

Advanced Studio Theater ~ Alternate Day – EN05050 – .5 credits, one semester, every other day, unlevelled. Open to students in ALL levels. Open to all grades. Advanced Studio Theater is open to students of all levels. Though no prerequisite is required, it is recommended that students take Studio Theater prior to taking Advanced Studio Theater. In this course, students will work in collaborative groups to produce a live performance of a variety of one-act plays. Students will be required to incorporate acting technique, stage design and management, and interpersonal communication and collaboration to complete the final class project.
Creative Writing – EN05200 – .5 credits, one quarter course, un leveled. Open to all grades. No prerequisites. This course is designed to offer both accomplished and novice writers the chance to improve their creative writing skills. This course may be taken more than once for credit. Course expectations and outcomes:

- Write in various genres and styles, including essays, short stories, poetry, and drama
- Critique and improve the student's writing and that of classmates in pairs and small groups
- Employ proofreading and editing skills to improve writing
- Work to achieve a personal voice in writing

[Creative Writing ~ Alternate Day – EN05250 – .5 credits, one semester, every other day, un leveled. Open to all grades. No prerequisites. This course is designed for music students but is an option for all students.]

Literature and Philosophy – EN05300 – .5 credits, one quarter course, un leveled. Open to students in grades 10, 11, and 12 only. This course explores how literature can help readers understand basic philosophical questions about knowledge, truth, reality, ethics, and aesthetics. Students will read accessible philosophical texts and apply the problems and ideas raised in those texts to works of literature. The course stresses student-initiated, intensive questioning and discussion, reading, and clear, concise writing.

Course expectations and outcomes:

- Students will develop an understanding of basic philosophical problems and how these problems are dramatized in literary texts
- Students will have a basic working vocabulary of philosophical concepts and branches including: epistemology, metaphysics, and ethics

Course requirements:

- At least one project based on a student-selected topic
- Student-lead symposium discussions
- At least one essay

Students electing this course should be aware that philosophical texts require intensive reading.

Research and Debate – EN05400 – .5 credits, one quarter course, un leveled. Open to grades 11 and 12 only. This course is an in-depth exploration of practical research skills, critical thinking and logic, theories of argumentation, and practical applications of argumentation. Different methods of research, methods of analysis (inductive and deductive), critical evaluation of reasoning and evidence, refutation, and debate will be discussed. Basic principles are applied in class discussions, informal debate situations, and formal debate situations.

Course expectations and outcomes:

- Understand theories of logic, argumentation and persuasion
- Develop critical thinking skills and the power of written and oral presentation through essays and debates
- Prepare for post high school education
Shakespeare – EN05600 – .5 credits, one quarter course, unleveled. Open to grades 10, 11, and 12 only. Students should have read at least one Shakespearean play in a previous course to enroll in this course.

Course expectations and outcomes are:
- Read, perform, and view on film or in a theater representative Shakespearean tragedies, comedies, histories, and poetry such as: *Othello, The Merchant of Venice, Richard III*, and Shakespeare’s sonnets
- Develop an understanding of the Elizabethan world through a study of Elizabethan theater, thought, and customs
- Analyze the historical background of Shakespeare’s works and his impact on modern literature and entertainment

Poetry for Everyone: Beats, Rhymes, Verse, Rhythm, and Life – EN05800 – .5 credits, one quarter course, unleveled. Open to students in all grades. No prerequisite. This course is for students who want to study, appreciate, and enjoy poetry in more depth than is possible in a regular English course. Students will learn how to analyze a poem’s structure, interpret its figurative language, evaluate its artistry, and reflect on its themes. Students will study Western and non-Western poetic movements. Students will perform dramatic interpretations of their own poetry and the poetry they have studied. The course is ideal for students who love poetry and like to read, write, discuss, and perform as well as students who wish to improve their skills in any or all of those areas.

Course expectations, outcomes, and statements from students who have taken the class:
- “The class provides students with the opportunity to discover and understand new perspectives and opinions through the analysis of poems and sharing personal work with other students.”
- The course “encourages students to look beyond their first impressions and delve deeper into the literary world.”
- “Be exposed to a wide berth of original, engaging works!”
- “This course helps you analyze poetry and helps you express what you really think.”
- “This class makes you think more in-depth about situations and groupings of words you would have never interpreted before.”

Media Studies I – EN05900 – 1 credit, one semester course, unleveled. Open to grades 10, 11 and 12. No Prerequisite. This class presents an overview of the field of journalism and mass communication and teaches students to be consumers of media and to understand news-gathering and production. It includes basic news writing, reporting, editing, and legal and ethical issues. This class is the pre-requisite for Media Studies II and III. After investigating journalism, video journalism, and photo journalism, students will choose to focus on written news production for *The Fordian*, Haverford’s online students news publication, photo journalism production for *The Fordian or Greystones* (the yearbook), or video journalism production and broadcasting for H-Vision, Haverford’s student news program. During their investigations, students will come to understand the responsibility of truth and objectivity in the development of a story across all media production formats. Grading will be based on an individual focus and differentiated on the format and news cycle involved.
Media Studies II – EN06000 – 1 credit, one semester course, unlevelled. Open to grades 10, 11 and 12.  
**Prerequisite: Successful completion of Media Studies I (Previously Broadcast Journalism I).** In Media Studies II, students will build upon the skills they have learned in Media Studies I, and will assume a greater amount of responsibility and authority over the video production process. Students who have successfully completed the first course will begin to act as production managers for cohorts of other students taking Media Studies I. As production managers they will lead the team in developing the idea for the story, writing, and coordinating the different pieces involved (photographer, writer, camera…etc.) Media Studies II will meet concurrently with Media Studies I to facilitate the peer-to-peer interaction that fosters learning. Students in Media Studies II will be expected to narrow their focus from the beginning of the course (*Fordian, Greystones*, or *H-Vision*) and will be graded with a higher total point value than Media Studies I.

Media Studies III – EN06100 – 1 credit, one semester course, unlevelled. Open to grades 10, 11 and 12.  
**Prerequisite: Successful completion of Media Studies I (Previously Broadcast Journalism II).** In Media Studies III, students will build upon the skills they have learned in Media Studies II, and will assume a greater amount of responsibility and authority over the production process. Students will be working independently on projects, as well as leading projects with students from Media Studies I and II. Media Studies III will meet concurrently with Media Studies I and II to facilitate the peer-to-peer interaction that fosters learning. Students in Media Studies III will complete a portfolio of segments, stories, or photographs in which they will have demonstrated responsibility. Students in Media Studies III will be encouraged to developed and complete more complex projects, such as short films and documentaries or longer and more in-depth journalistic endeavors with an increasing level of independence. They must act as editors or directors in their chosen track (journalism, video journalism, or photo journalism) and their grade will include this leadership component.

Dystopian Literature – EN06200 - .5 credits, one quarter course, unlevelled. Open to all grades.  
**No prerequisites.** Human beings have a natural tendency to desire a better future and to daydream about living in a more perfect society, but what happens when that perfect utopia becomes twisted and corrupt? Dystopian literature creates visionary, captivating, and often terrifying worlds that comment on issues in modern society. This course’s themes will explore governmental control, gender roles, art versus science, restriction versus freedom, and self-actualization versus society as a whole. Students will read a variety of dystopian novels including titles such as *1984*, *Fahrenheit 451*, *The Handmaid’s Tale*, *Anthem*, *The Hunger Games*, and *Divergent* in addition to reading short stories and viewing some dystopian films. This course is ideal for students who love reading and who want to promote responsible global citizenship. Critical and analytical discussions and writing will be required.

Rhetoric in Film – EN06300 - .5 credits, one quarter course, unlevelled. Open to all grades.  
**No prerequisites.** Effective communication and interpretation of the world is a necessary life skill. In a student’s academic studies, he or she is often presented with the tools of communication analysis in the form of rhetoric. Though in most courses rhetoric is only studied through the verbal medium, rhetoric is most readily accessible to students visually; this type of interaction is also likely to continue throughout students’ lives, in advertisements, television, and film. In Rhetoric in Film, students will study examples of visual rhetoric found within advertisements, short films, documentaries, and popular films. Students will analyze each example under the frame of the rhetorical triangle. Through discussion and analytical writing, students will develop their critical lens of visual rhetoric, allowing them to understand the persuasive messages that run underneath every piece of visual media in the world today.
Freshman Reading and Writing Enrichment – EN00500 – 1 credit, one semester course, unlevelled.

Open to students in grade 9 only. This course is a requirement for all students who score within the Basic and Below Basic ranges in reading on the seventh grade or eighth grade Pennsylvania System of School Assessment (PSSA) or on the 4Sight® standardized tests. These ranges are based on the Pennsylvania Performance Levels. Through Freshman Reading and Writing Enrichment, students will improve their reading, writing, learning and studying skills for success with the complex literacy tasks of high school courses. Students assigned to this class will benefit from small-group instruction on a variety of reading strategies and writing techniques. Students will also work with an intensive reading intervention program that directly addresses individual needs through adaptive and instructional software, high-interest literature, and direct instruction in reading skills.

Reading Enrichment – EN00600 – 1 credit, one semester course, unlevelled. Open to students in grades 10-12. Students who score in the Basic and Below Basic ranges on the Keystone Literature test could be placed in the Reading Enrichment program. Reading Enrichment is a course designed to supplement the traditional English program taken by students at the secondary level with a strong focus on developing students’ reading and writing skills. Students who are assigned to this class will benefit from small-group and individualized instruction on a variety of reading techniques and strategies. Students will also be working each day with an intensive reading intervention program that directly addresses individual needs through adaptive and instructional software, high-interest literature, and direct instruction in reading skills.

Skills For Test Taking – MI06100 – .5 credits, one quarter course, unlevelled. Open to students in 10, 11, and 12 grades only. Prerequisites: Successful completion of Algebra I and English 9. A Texas Instruments TI-82/83 graphing calculator is required. This course is designed for students who wish to develop their test-taking skills for the PSAT, SAT, and ACT tests.

Course outcomes and expectations:

- Identify and apply the significant numeric/algebraic/geometric concepts, procedures and problem solving to simulate the PSAT, SAT and ACT
- Increase vocabulary, develop focused reading and writing strategies
- Identify specific test constructions and strategies that will be modeled in the PSAT, SAT and ACT
- Identify and discuss data that will help improve personal performances on simulated PSAT, SAT and ACT
Family and Consumer Science Department

If you love little children and want to learn more about them … If you want to learn how to find a job … or budget money … or end your confusion about credit, bank and ATM cards … If you want more information on consumer awareness, healthy living and personal relationships … These family and consumer science courses can help you by providing knowledge and skills to help you improve your future.

Child Development
Enroll for only one child development course per year.

Child Development I – FC01100 – 1 credit, one semester course, unleveled. Open to all students in grades 10, 11, and 12. Students have the opportunity to better understand their own development as they observe 3 and 4-year-old children in a preschool situation within the high school. Students will participate in the preschool through the teaching of lessons, observations and written evaluations.

Course outcomes and expectations are:
- Identify the physical, intellectual, social, and emotional stages of a child (three-5 years)
- Prepare, execute and evaluate 12 developmentally appropriate lessons for preschool children
- Evaluate the negative and positive aspects of lessons performed by peer teachers
- Prepare a portfolio of anecdotal observations of preschoolers and written evaluations of peer teachers
- Compose three different developmental profiles of preschoolers

Child Development II – FC01200 – 1 credit, one semester course, unleveled. Open to all students in grades 10, 11, and 12. Prerequisite: Child Development I - (Grade of B or better). Students have the opportunity to participate in the preschool program by teaching, evaluating, and supervising young children. Students investigate career opportunities associated with children.

Course outcomes and expectations are:
- Assume leadership roles within the preschool class
- Prepare, execute and evaluate 14 developmentally appropriate lessons for preschool children
- Evaluate the negative and positive aspects of lessons performed by fellow classmates
- Investigate career opportunities involving children and generate a research paper on a child-related topic
- Generate a research paper on a child-related career and present it orally
- Assume leadership roles within the preschool class

Child Development III – FC01300 – 1 credit, one semester course, unleveled. Open to all students in grades 11 & 12. Prerequisite: Child Development II - (Grade of A). This advanced child development course is designed for those students interested in working with young children both in the high school situation and as a career choice. The course provides the opportunity to observe, as well as participate in, the kindergarten and primary-grade programs in the local district schools.

Course outcomes and expectations are:
- Complete an internship in a district elementary classroom
- Observe the behavior patterns of elementary children
- Maintain a daily log of all elementary experiences including reactions to the internship
- Prepare a written and oral report on the value of an elementary internship

32
Preparing for Adult Life – FC03000 – .5 credits, one quarter course, unlevelled. Open to all students in grades 11 and 12. No prerequisite. Ever wonder how you will make it on your own? This course is designed for any student who plans on either going to college or living on their own right after high school. Topics include: setting SMART goals, making wise decisions, exploring college and career options, creating and balancing budgets, evaluating housing options, and analyzing car buying will all be addressed. Through activities, discussion, and project based learning, students will explore the basic life skills needed to successfully live on their own. Many key speakers are brought in to discuss relevant topics.

Course outcomes and expectations:
• Research career pathways based on interests and skills
• Complete an Employment Portfolio which includes a resume and cover letter
• Analyze proper attire for job interviews and learn skills to nail a job interview
• Investigate the benefits of using the Naviance website to complete career and college aptitude assessments
• Understand the college application process including the common app and the components of a financial aid package
• Discuss strategies to be successful in college, including campus resources, study and time management skills
• Identify the potential pitfalls of credit card use including identity theft
• Demonstrate abilities to balance a check book

Best of Baking – FC03100 – .5 credits, one quarter course, unlevelled. Open to all students. No prerequisite. This course will provide students with an opportunity to develop food preparation skills in the planning, preparation, experimentation, and evaluation of pies, cakes, breads, cookies, yeast breads, and quick breads. Low fat baking is also explored.

Course outcomes and expectations are:
• Prepare a wide variety of baked products while working cooperatively in groups
• Analyze the differences in convenience and homemade products including cost, calories, and nutrition
• Evaluate baked laboratory products for flavor, appearance, nutritional value, calorie content, and cost

Foods for Today – FC03200 – .5 credits, one quarter course, unlevelled. Open to all students. No prerequisite. This course provides students with skills in meal planning, food preparation, nutrition, and current food trends. Modern appliances, the microwave, blender, electric mixer, and processor, will be used. This course will focus on fruits, vegetables, grains, milk, eggs, and cheese.

Course outcomes and expectations are:
• Read and follow recipes and use food preparation equipment effectively and efficiently producing quality products of nutritional value
• Read and summarize newspaper or magazine articles pertinent to each food unit
• Create a ‘Nutrient Poster’ with emphasis on the functions of the six nutrients and healthy examples of foods that provide each nutrient
Foods of the World – FC03300 – .5 credits, one quarter course, unleveled. Open to all students in grades 10, 11 and 12. *Prerequisite: Successful completion of one high school foods course.* This major international cuisine course demonstrates the effect of culture and geography on foods in various areas of the world. Interesting foods from Italy, France, Germany, Japan, China, the Middle East, Greece, Mexico, and Scandinavia will be prepared.

Course outcomes and expectations are:

- Read and follow recipes, and use food preparation equipment effectively and efficiently to produce quality products representative of these foreign cuisines
- Read and summarize newspaper or magazine articles pertinent to individual topics
- Research and prepare a written report on a culture not included in classroom study; plan and perform a group demonstration or a travel brochure of a unique recipe depicting this culture’s cuisine.

Preparing For Parenthood – FC03400 – .5 credits, one quarter course, unleveled. Open to all students. *No prerequisite.* Parenting is a complicated job filled with feelings, questions and uncertainties. This course discusses the decision-making processes in preparation for parenthood. Students become involved in a parent simulation experience, use role-playing, discussion, video tapes, textbooks and other aids to explore the world of parenting.

Course outcomes and expectations are:

- Identify the growth and development patterns of children from conception to infancy and the role of the parent in maximizing this development
- Explore the contemporary challenges and concerns facing parents in raising a family
- Identify the parenting skills that that are proven more effective in interacting with and guiding children
- Complete a daily journal documenting and evaluating parenting simulation experience using the “Baby Think It Over Doll”
- Prepare an oral presentation on a contemporary parenting topic employing visual aids with written documentation.

Contemporary Sewing and Crafts – FC03500 - .5 credits, one quarter course, unleveled. Open to all students. *No prerequisite.* (May be taken more than once for credit.) *Students are required to buy and supply fabric and notions for four individual projects.* This course gives students the opportunity to develop sewing skills by making their own clothing using a commercial pattern. Students may also make fashion accessories, stuffed animals, pillows and new craft items.

Course outcomes and expectations are:

- Demonstrate proficiency and practice safety when using the sewing machine and related equipment
- Demonstrate knowledge of construction techniques used in a commercial pattern
- Work cooperatively as a group to complete a quilt that will be donated to a local charity
- Complete four projects (in addition to the quilt – three of which should be garments) that will include the applications of darts, seams, gathers or tucks, zippers, waistband, collar or cuffs, hand and machine hem, buttonhole and buttons.
Fine Arts Department

Mission Statement:

All people can make well-crafted art through practice, ingenuity, and grit. As art teachers, we coach the mindful use of materials and awareness of the arts in society. We invite you to create in a playful, respectful, and rigorous environment.

PA graduation requirements specify 2.0 credits (36 weeks) in the arts and humanities. You can satisfy this requirement with four quarters of fine art classes, or in combination with other arts and humanities courses.

Careers and post-secondary programs in design and the creative arts will require portfolios of art work that show off your creativity and technical skills. Build a portfolio over 2-4 years by choosing a sequence of Fine Art and other elective courses that will give you a broad range of experiences. Traditional Arts, Computer Graphics, and 3-D courses (Ceramics, Sculpture, and Fashion) all can lead to Advanced Placement Studio Art for possible college credit.

Alternate Day Courses: Some of our quarter courses may be scheduled as alternate A/B day courses when there is sufficient demand. If you plan to take alternate day courses, like those in Music or Support, you can take Ceramics or Digital Photography & Photoshop or Animation your alternate days instead of a Study Hall.

The following art courses have no prerequisite, and are designed so that beginners and more experienced students alike will be both challenged and successful:

- Art History
- Art 1
- Ceramics 1
- Computer Animation 1
- Digital Advertising and Design 1
- Digital Photography and Photoshop 1
- Fashion Design 1
- Printmaking 1
- Sculpture 1
- World Crafts

Art 1 – AR01100 – 1 credit, one semester course, unleveled. Open to students of all skill levels. Open to all grades. No prerequisite. The Art 1, 2, and AP 2-D and/or Drawing Studio course progression is a sequence leading the student from basic art skills through advanced, with a primary focus on two-dimensional work. These courses are foundational for careers in all types of creative arts and design. Students will learn drawing, composition, color theory, art history and criticism, and be introduced to a wide variety of materials and techniques.

Art 2 – AR01200 – 1 credit, one semester course, unleveled. Open to all grades. Prerequisite: Art 1, Fashion Design 1, or permission of the instructor. Art 2 revisits many of the skills covered in Art 1, with more advanced, longer-term projects. Portfolio development for college and career planning begins with more extensive drawing, designs in black/white and color, a 3-D project incorporating personal narratives, and your own personal book.
Advanced Placement Studio Art: 2-D Design – AR01401 – 1 credit, one semester course, offered first semester only, AP level. Open to grades 11 and 12. **Prerequisites: completion of Art 1, Art 2, at least one other Art elective, and Art History, or permission of the instructor.** Students develop a portfolio that demonstrates mastery of 2-D design through any two-dimensional medium or process, including, but not limited to: graphic design, digital imaging, photography, collage, fabric design, weaving, fashion design, fashion illustration, painting and printmaking. Coursework includes: summer assignments, 20 variations of a design, finished drawings, a personal book, and presentations to colleges. The AP Exam (for possible college credit) is completed by submitting a portfolio and required essays in May. Recommended for students interested in careers in design, media, architecture, marketing, and fine art. **Portfolio Preparation AR04001** is required in the 3rd quarter for students submitting an AP Portfolio and participating in the AP Art Show.

Advanced Placement Studio Art: 3-D Design – AR01501 – 1 credit, one semester course, offered first semester only, AP level. Open to grades 11 and 12. **Prerequisites: completion of Art 1, Art 2, Sculpture 1 and/or Ceramics 1, and Art History, or permission of the instructor.** Students develop a portfolio that demonstrates mastery of 3-D design through any three-dimensional medium or process, including, but not limited to: ceramics, sculpture, crafts, and fashion design. Coursework includes: summer assignments, 20 variations of a 3-d design, finished 3-d objects, a personal sketch book, and presentations to colleges. The AP Exam (for possible college credit) is completed by submitting a portfolio and required essays in May. This course is recommended for students interested in careers in design, media, architecture, marketing, and fine art. **Portfolio Preparation AR04001** is required in the 3rd quarter for students submitting an AP Portfolio and participating in the AP Art Show.

Advanced Placement Studio Art: Studio Drawing – AR01601 – 1 credit, one semester course, offered first semester only, AP level. Open to grades 11 and 12. **Prerequisites: completion of Art 1, Art 2, at least one other Art elective, and Art History, or permission of the instructor.** Students develop a portfolio that demonstrates mastery of Studio Drawing through intensive drawing and painting, with a focus on observational work. Coursework includes: summer assignments, 20 variations of a design, finished drawings and paintings, a sketch personal book, and presentations to colleges. The AP Exam (for possible college credit) is completed by submitting a portfolio and required essays in May. This course is recommended for students interested in careers in design, media, architecture, marketing, and fine art. **Portfolio Preparation AR04001** is required in the 3rd quarter for students submitting an AP Portfolio and participating in the AP Art Show.

**Art History** – AR03000 – .5 credits, one quarter course, **unleveled.** Open to all grades. **No prerequisite.** This course is a survey of ancient to modern art, both Western and Non-Western. Learn about major art movements and the historical and cultural events that sparked them. This is not a studio class, but is recommended as a complement to studio art, World Language, and Social Studies courses. This course is a prerequisite (or co-requisite) for AP Studio Design courses.

**Portfolio Preparation (H)** – AR04001 – .5 credits, third quarter only course, **honors level.** Open to grades 11 and 12. **Prerequisite: AP Studio Art: 2-D Design or with permission of the instructor.** This course is required for students who are submitting an AP Studio Art Portfolio and/or are participating in the AP Art Show planning and presentation. Students preparing portfolios for art or design college majors or a creative arts career will learn finishing skills and add needed art pieces. Physical and digital/slide portfolios will be prepared. Serious students of Art or Design (such as Architecture, Fashion, Marketing, Digital, or Industrial/Manufacturing) who are not enrolled in AP Studio courses may be admitted with permission of the instructor.
Fashion Design 1 – AR04100 – 1 credit, one semester course, **unleveled.** Open to students of all skill levels. Open to all grades. **No prerequisite.** An introduction to the fundamentals of designing for the fashion industry, figure drawing, and basic fine arts techniques. Students will work through all of the stages of design, from inspiration research, rough sketches, finished fashion illustrations, clothing pattern development, and clothing flats. Fashion design covers men’s and women’s clothing, and is an excellent introduction to designing for commercial applications. Students are encouraged to take Fashion Design as a companion to Contemporary Sewing and Crafts.

Fashion Design 2 – AR04200 – 1 credit, one semester course, **unleveled.** Open to grades 10, 11 and 12. **Prerequisite:** Fashion Design 1. Designing for the fashion industry, advanced figure and fabric rendering. Students will work through all of the stages of design, from inspiration research, rough sketches, finished fashion illustrations, clothing pattern development, and clothing flats. Students who are serious about a design career are encouraged to follow this course with AP Studio Art: 3-D. Students who have taken Contemporary Sewing and Crafts may begin making sewing patterns for prototype garments based on their designs.

Ceramics 1 - AR04400 – 0.5 credits, one quarter course, **unleveled.** Open to students of all skill levels. Open to all grades. **No prerequisite.** Ceramics 1 focuses on hand-building clay vessels and basic glazing techniques. The history and traditions of ceramics will be covered.

[Ceramics ~ Alternate Day – AR04450 – .5 credits, one semester, every other day, **unleveled.** Open to students in ALL levels. Open to all grades. **No prerequisites.** Same description as above.]

Ceramics 2 - AR04500 – 0.5 credits, one quarter course, **unleveled.** Open to all grades. **Prerequisite:** Ceramics 1 with a “B+” or better. Ceramics 2 teaches wheel pottery techniques, and more advanced hand-building, glazing, and finishing methods. Students who are serious about ceramics are encouraged to follow this course with AP Studio Art: 3-D.

Ceramics 3 - AR04600 – 0.5 credits, one quarter course, **unleveled.** Open to grades 10, 11, and 12. **Prerequisite:** Ceramics 2 with an “A” average in Ceramics 1 and 2. Ceramics 3 gives students a chance to explore individual interests, including larger wheel-thrown and hand built vessels. Students will be expected to reference historical and current ceramics in their own work. Students who are serious about ceramics are encouraged to follow this course with AP Studio Art: 3-D.

Computer Animation 1 – AR04700 – .5 credits, one quarter course, **unleveled.** Open to students of all skill levels. Open to all grades. **No prerequisite.** This course introduces the rapidly growing field of computer animation. Students will learn basic principles of computer generated animation. Students will use drawing skills to focus on character development, backgrounds, and storyboards. Students will also study traditional animation and gain appreciation for early cinema. Students use Adobe Flash in conjunction with traditional animating techniques to create original short films. This course is useful for college majors and careers in game design, digital media, animation, and communications.

[Computer Animation 1 ~ Alternate Day – AR04750 – .5 credits, one semester, every other day, **unleveled.** Open to students in ALL levels. Open to all grades. **No prerequisites.** Same description as above.]

Computer Animation 2 – AR04800 – .5 credits, one quarter course, **unleveled.** Open to all grades. **Prerequisite:** Computer Animation 1. Students use Adobe Flash in conjunction with traditional animating techniques to create original short films. Students will write, draw, storyboard, and animate their films, building on the skills learned in Animation 1. This course is recommended for students interested in Videography.
Digital Advertising and Design 1 – AR04900 – .5 credits, one quarter course, unlevelled. Open to students of all abilities. Open to all grades. No prerequisite. This course introduces the world of graphic design as an opportunity to create commercial art on the computer. The Adobe Illustrator application is used to prepare advertising, package design, commercial layouts, and other publications. This course is useful for college majors and careers in design, media, and communications, and an excellent companion to Business Education courses.

Digital Advertising and Design 2 – AR05000 – .5 credits, one quarter course, unlevelled. Open to all grades. Prerequisite: Digital Advertising and Design 1. The Adobe Illustrator application is used to prepare advertising, package design, commercial layouts, and other publications.

Digital Photography and Photoshop 1 – AR05100 – .5 credits, one quarter course, unlevelled. Open to students of all skill levels. Open to all grades. No prerequisite. Students use Adobe Photoshop to edit and modify digital photographs. Basics of composition, subject choice, criticism, and aesthetics will be explored as students create digital photographic projects. Useful for everyone interested in digital images, and essential for those considering careers in the creative arts.

Digital Photography and Photoshop 2 – AR05200 – .5 credits, one quarter course, unlevelled. Open to grades 10, 11 and 12. Prerequisite: Digital Photography and Photoshop 1. Students use Adobe Photoshop to edit and modify digital photographs. More advanced composition, subject choice, criticism, and aesthetics will be explored as students create digital photographic projects.

Painting Studio 1 – AR05300 – .5 credits, one quarter course, unlevelled. Open to grades 10, 11 and 12. Prerequisite: Art 1, or permission of the instructor. An intensive course in painting, drawing, and composing with color. Subjects will primarily be drawn from observation. This course will advance skills in rendering, color use, and composition, and is useful for those interested in fine arts, graphic, fashion, industrial, and architectural design.

Painting Studio 2 – AR05400 – .5 credits, one quarter course, unlevelled. Open to grades 10, 11 and 12. Prerequisite: Painting 1. Students will continue exploring techniques covered in Painting 1. Individual subject and style selection will be encouraged.

Printmaking 1 – AR05500 – .5 credits, one quarter course, unlevelled. Open to students of all skill levels. Open to all grades. No Prerequisite. This course will cover a range of printmaking techniques, including relief, intaglio, and monotype. These prints will be used in the creation of unique artists’ books which might include students’ own creative writing and artwork. Students who write music, poetry, short fiction, or who create graphic/illustrated stories are encouraged to enroll. No prior drawing skill is required, and any necessary drawing skills will be taught.

Printmaking 2 – AR05600 – .5 credits, one quarter course, unlevelled. Open to grades 10, 11 and 12: Prerequisite: Printmaking 1. This course will cover a range of printmaking techniques, including relief, intaglio, and monotype. These prints may be used in the creation of unique artists’ books which might include students’ own creative writing and artwork. Students learn to make editions of both prints and books.
**Sculpture 1** – AR05700 – .5 credits, one quarter course, **unleveled**. Open to students of all skill levels. Open to all grades. *No prerequisite*. Sculpture 1 introduces students to a variety of materials and techniques for 3-D composition. The history and cultural uses of sculpture will include an examination of its use in architecture, furnishings, and as a free-standing art form.

**Sculpture 2** – AR05800 – .5 credits, one quarter course, **unleveled**. Open to grades 10, 11, and 12. 
*Prerequisite: Sculpture 1 or permission of the instructor*. Sculpture 2 continues the use of a variety of materials and techniques for 3-d composition. Sculpting from observation and with reference to historical and current art is expected. Students who are serious about sculpture are encouraged to follow this course with AP Studio Art: 3-D.

**Sculpture 3** – AR05900 – .5 credits, one quarter course, **unleveled**. Open to grades 10, 11, and 12. 
*Prerequisite: Sculpture 2*. Sculpture 3 allows the student to work on individual 3-D projects. Students who are serious about sculpture are encouraged to follow this course with AP Studio Art: 3-D.

**World Crafts** – AR06000 – .5 credits, one quarter course, **unleveled**. Open to students of all skill levels. Open to all grades. *No prerequisite*. World Crafts introduces the history and many techniques of world-wide handicrafts, including textiles, ceramics, and decorative arts. Students will learn to design, sketch and make beautiful objects.
Mathematics Department

Courses provide opportunities for each student to become proficient in mathematics. Teaching and learning will focus on:

- Conceptual understanding
- Procedural abilities
- Problem-solving skills

Math courses require students to be responsible for and actively involved in their own learning. Our math program requires students to effectively demonstrate the outcomes found in Pennsylvania State’s Academic Standards for Mathematics, as well as the Haverford Graduation Outcomes.

Successful students are responsible for content-specific performance outcomes. Students will use:
  - New modes of communication and procedural skills
  - Technologies of graphing calculators, computers, or iPads to support their mathematical development
  - Sound mathematical reasoning to develop conjectures and support conclusions.

Students must learn to communicate effectively using appropriate English, symbolic notations, tables, lists and graphs. Successful students must find and make connections among mathematical ideas and their applications to real-world situations.

The Haverford High School mathematics program contains required sequential courses with prerequisites. Unless otherwise noted, a prerequisite course must be successfully completed with a grade of “B” in honors, a grade of “C” in college prep, and a passing grade in the career track before a student continues with the next course at the same level. Any student not meeting these prerequisites may continue with the next course in the sequence but at a lower level or should retake the course at the same level. These prerequisites are necessary to provide the student with the opportunity to develop a proficient understanding of the concepts and skills. Serious consideration should be given to teacher recommendations regarding the next mathematics course to be scheduled.

The course selection process is based on the following course prerequisites, the scope and nature of the work required, the course's demands, graduation requirements, and standardized test scores. All students must complete four (4) credits in mathematics. Because the SATs include concepts covered in Algebra 1, Geometry, and Algebra 2, it is highly recommended that students complete Algebra 2 by their junior year. It is also strongly recommended that level 2 (College Prep) students take one math course per year. Additional higher-level math courses including Pre-Calculus, Probability/Statistics, and possibly Calculus are recommended for students continuing mathematics or science study after high school. A TI graphing calculator is highly recommended for all mathematics courses.
Course Sequence for Math

Find the last math course you passed this year. Read down the chart to determine the next math course you should schedule.

**Honors**

- Algebra 1 (H) (MA01101)
- Geometry (H) (MA01201)
- Algebra 2 (H) (MA01301)
- Pre-Calculus (H) (MA04001)
  - AP Calculus AB (full-year course) (MA04201)
  - AP Calculus BC (full-year course) (Covers AB and BC Calculus) (MA04301)
- Topics of Calculus C (second semester only) (MA04401)

**College Prep**

- Algebra 1 (A) (MA01102)
- Geometry (A) (MA01202)
- Algebra 2 (A) (MA01302)
- Algebra 3 (A) (MA01402)
- Pre-Calculus (MA04002)
- Geometry (Career Track) (MA01203)
- Algebra 2 (Career Track) (MA01303)
- Algebra 2 (Career Track) (MA01303)
- Transitional Math (Career Track) (MA01503)

Students not proficient on the Keystone Algebra 1 Exam MUST take the Keystone Algebra 1 Seminar.

Probability/Statistics may be taken any time after completing Honors Algebra 2 or College Prep Algebra 3.

If you are planning to change levels (honors to college prep or college prep to honors) you **MUST** speak to your present math teacher.
Course Descriptions

**Algebra I (H) – MA00901** - 1 credit, one semester course, honors level. Open to grade 9 only. This course covers the expected content of any algebra 1 class. The first five chapters cover graph interpretations, graphing linear and nonlinear functions, combining like terms, the distributive property, writing and solving linear equations, similar figures and direct variation. Chapters six through twelve cover multiplication of binomials, slope, equation of lines, factoring, solving quadratics by factoring and the quadratic formula, solving systems of equations, properties of exponents, solving inequalities, and rational expressions and equations. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course. This course will prepare students to take the Algebra 1 Keystone Exam.

**Algebra I (A) – MA00902** – 2 credit, full year course, college prep level. This course covers the expected content of any algebra 1 class. The first five chapters cover graph interpretations, graphing linear and nonlinear functions, combining like terms, the distributive property, writing and solving linear equations, similar figures and direct variation. Chapters six through twelve cover multiplication of binomials, slope, equation of lines, factoring, solving quadratics by factoring and the quadratic formula, solving systems of equations, properties of exponents, solving inequalities, and rational expressions and equations. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course. This course will prepare students to take the Algebra 1 Keystone Exam.

**Algebra 1 Seminar – MA01100** - 1 credit, one semester course, unleveled. This requirement is state-mandated and is for students who were not proficient on the Keystone Algebra 1 Exam. All of the concepts from Algebra 1 will be covered. Individualized plans for students will be developed as indicated by the student’s results on the Keystone Algebra 1 Exam. Students will retake the Keystone Algebra 1 Exam at the completion of this course. **Enrollment in the course is mandatory for those students who were not proficient on the Keystone Algebra 1 Exam. This course will be automatically scheduled in lieu of another math course.**

**Geometry (H) – MA01201** – 1 credit, one semester course, honors level. Open to ALL students in grades 9, 10, 11 and 12. **Prerequisite: Honors Algebra 1 with an expected minimum final grade of B.** This course covers the expected content of any geometry class. The first five chapters cover transformations, symmetry, attributes and characteristics of shapes, angle relationships, area, Pythagorean Theorem, similarity, triangle similarity and congruence, trigonometry (sine, cosine, and tangent), special right triangles, and the law of sines and cosines. Chapters seven through twelve cover proofs with triangles and quadrilaterals, coordinate geometry, angles and areas of polygons, volume and surface area of prisms, relationships within circles, equation of a circle, and characteristics, volume and surface area of pyramids, cones and spheres. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.
**Geometry (A) – MA01202** – 1 credit, one semester course, **college prep level.** Open to ALL students in grades 10, 11 and 12. *Prerequisite: Algebra I with an expected minimum final grade of C.* This course covers the expected content of any geometry class. The first five chapters cover transformations, symmetry, attributes and characteristics of shapes, angle relationships, area, Pythagorean Theorem, similarity, triangle similarity and congruence, trigonometry (sine, cosine, and tangent), and special right triangles. Chapters seven through twelve cover proofs with triangles and quadrilaterals, coordinate geometry, angles and areas of polygons, volume and surface area of prisms, relationships within circles, equation of a circle, and characteristics, volume and surface area of pyramids, cones and spheres. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.

**Geometry – MA01203** – 1 credit, one semester course, **career track level.** Open to ALL students in grades 10, 11 and 12. *Prerequisite: Passing grade in Algebra I.* This course covers the expected content of any geometry class. The first five chapters cover transformations, symmetry, attributes and characteristics of shapes, angle relationships, area, Pythagorean Theorem, similarity, triangle similarity and congruence, trigonometry (sine, cosine, and tangent), and special right triangles. Chapters seven through twelve cover proofs with triangles and quadrilaterals, coordinate geometry, angles and areas of polygons, volume and surface area of prisms, relationships within circles, equation of a circle, and characteristics, volume and surface area of pyramids, cones and spheres. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.

**Algebra II (H) – MA01301** – 1 credit, one semester course, **honors level.** Open to ALL students in grades 10, 11 and 12. *Prerequisite: Honors Geometry with an expected minimum final grade of B.* This course covers the expected content of any algebra 2 class. The first five chapters cover functions, sequences, exponential functions, transformations of parent graphs, solving systems of equations algebraically and graphically, and solving systems of inequalities graphically. Chapters six through thirteen cover logarithms, trigonometric functions, polynomial functions, conic sections, and analytic trigonometry. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.

**Algebra II (A) – MA01302** – 1 credit, one semester course, **college prep level.** Open to ALL students in grades 10, 11 and 12. *Prerequisite: Geometry with an expected minimum final grade of C.* This course covers functions, sequences, exponential functions, transformations of parent graphs, solving systems of equations algebraically and graphically, and solving systems of inequalities graphically. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.

**Algebra II – MA01303** – 1 credit, one semester course, **career track level.** Open to ALL students in grades 10, 11 and 12. *Prerequisite: Passing grade in Geometry.* This course covers functions, sequences, exponential functions, transformations of parent graphs, solving systems of equations algebraically and graphically, and solving systems of inequalities graphically. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.
Algebra III (A) – MA01402 – 1 credit, one semester course, college prep level. Open to ALL students in grades 10, 11 and 12. **Prerequisite: Algebra 2 with an expected minimum final grade of C.** This course covers logarithms, trigonometric functions, polynomial functions, and analytic trigonometry. Technology is used to enrich problem solving skills and to develop graphing techniques through the use of the TI graphing calculator. A graphing calculator is highly recommended for this course.

Transitional Math – MA01503 – 1 credit, one semester course, career track level. Open to students in grades 10, 11 and 12. **Prerequisites passing grade in Algebra 2.** This course provides a foundation in the mathematic skills needed to be successful in a college or trade school entrance exam. These skills include arithmetic of whole numbers, fractions, decimals, ratios, proportions and percents, algebraic topics including signed numbers, graphing and solving equations, solving word problems and geometric topics including area and volume.

Course outcomes and expectations:

- Apply problem solving skills to math-related problems
- Apply algebra and geometry skills to problem solve.
- Use the language and notation of mathematics
- Demonstrate increased confidence in basic mathematical ability without using a calculator.

Probability/Statistics (H) – MA03001 – 1 credit, one semester course, honors level. Open to students grades 10, 11, and 12. **Prerequisite: Algebra II (H)(MA01301) with an expected minimum final grade of B. This course does not prepare a student for the AP exam.** A Texas Instrument graphing calculator is required. This is an advanced course that strives for familiarity with and use of probability, descriptive and parametric statistics, as well as sampling techniques. Students are expected to do group/individual tasks to collect, organize, and analyze data. From these analyses, students will communicate their findings and make predictions. This course employs practical situations and information sources, activities, and labs. Students are expected to proficiently use the statistics portion of the graphics calculator as a modeling and communications tool.

Probability/Statistics – MA03002 – 1 credit, one semester course, college prep level. Open to students grades 10, 11, and 12. **Prerequisite: Algebra III (MA01402) with an expected minimum final grade of C.** A Texas Instrument graphing calculator is required. In this core course students become familiar with and use probability, descriptive and parametric statistics, and sampling techniques. Students are expected to do group/individual tasks to collect, organize, and analyze data. From these analyses students will communicate their findings and make predictions. This course uses many practical situations and information sources activities, and labs. Students are expected to proficiently use the statistics portion of the graphics calculator as a modeling and communications tool.

Course outcomes and expectations:

- Make decisions based on determined probabilities, measure of central tendency, variability or normal distribution.
- Calculate simple counting problems with the set and fundamental counting principles, permutations, and combinations.
- Represent data samples and the probabilities with the appropriate tables, equations and graphs.
- Model theoretical and real world data with discrete and continuous probability distributions.
- Collect, organize and analyze data and appropriately communicate the results, hypotheses or conjectures.
- Model real world data with graphing calculators, spreadsheets and a computer statistics application.
Advanced Placement Statistics – MA03101 – 2 credit, year-long course, AP level. Open to grades 11 and 12. **Prerequisite: Algebra II(H) with an expected minimum final grade of B.** A Texas Instruments graphing calculator is required. Upon completion of this course, students will have a solid foundation in the four major themes of the AP exam:

- Exploratory analysis of data makes use of graphical and numerical techniques to study patterns and departures from patterns.
- Data must be collected according to a well-developed plan if valid information on a conjecture is to be obtained.
- Probability is the tool used for anticipating what the distribution of data should look like under a given model.
- Statistical inferences guide the selection of appropriate models.

Materials used to teach the course come from textbooks, classroom discussions, newspapers, journals, medical newsletters, videos, and the internet. The student version of MiniTab is the software package used on the computer. Students will be expected to complete statistics computer assignments. In accordance with the honors expectations, projects are a major part of the course.

**Pre-Calculus with Limits (H) – MA04001** – 1 credit, one semester course, honors level. Open to students grades 10, 11, and 12. **Prerequisite: Algebra II (H) with a final grade of C or better, or Algebra III with a final grade of B or better.** A Texas Instrument graphing calculator is required. This is an advanced pre-calculus course in which students explore the concepts of functions, (polynomial, trigonometric, exponential, logarithmic, absolute value, rational and piece-wise), as well as their inverses (if they exist). Students are expected to be strong, independent learners who can work in study groups. Students use the characteristics of functions to discuss the relationship between related quantities.

Course outcomes and expectations are:

- Represent functions with tables, equations and graphs
- Classify and identify functions by their properties and characteristics.
- Model theoretical and real-world data with functions using the graphing calculator
- Manipulate expressions into equivalent forms
- Explore the limit concept and process to functions
- Communicate about the notions of functions orally and in writing

**Pre-Calculus with Limits – MA04002** – 1 credit, one semester course, college prep level. Open to students grades 11 and 12. **Prerequisites: Algebra II (H) with a final grade of C or better or Algebra III with a final grade of B or better.** A Texas Instruments graphing calculator is required. This is a pre-calculus course presented with a slower pacing than **Pre-Calculus (H).** Students will explore the concepts of functions, (polynomial, trigonometric, exponential, logarithmic, absolute value, rational, and piece-wise), as well as their inverses (if they exist). Students use the characteristics of functions to discuss the relationships between quantities. This course is designed for students who wish to extend their study of high school mathematics and to prepare for the possibility of taking college calculus; however it is not intended for students planning to take AP Calculus at Haverford (such students should schedule **Pre-Calculus (H)** instead).

Course outcomes and expectations are:

- Represent functions with tables, equations, and graphs
- Classify and identify functions by their properties and characteristics
- Model theoretical and real-world data with functions using the graphing calculator
- Manipulate expressions into equivalent forms
- Explore the limit concept and process to functions
- Communicate about the notions of functions orally and in writing
Calculus (H) – MA04101 – 1 credit, one semester course, honors level. Open to students in grades 11 and 12. Prerequisites: Pre-Calculus with Limits (H) with an expected minimum final grade of B. This course is not sufficient for success in the Advanced Placement Calculus Exam. Calculus covers the introduction and application of the concepts of a function’s limits, derivatives, and integrals of a function. Real-valued functions are used and applied to model theoretical and realistic situations. The graphing calculator aids as a modeling and communication tool for investigating the characteristic behavior of functions.

Course outcomes and expectations are:

- Apply the limit concept process to Difference Quotients, Riemann Sums and other functions
- Create functions that model real world and theoretical situations
- Apply differential calculus to solve theoretical and real world problems
- Compute the value of the definite integral to solve theoretical and real world problems
- Apply appropriate technologies to investigate and confirm calculus concepts/applications
- Communicate about the applications and concepts of calculus orally and in writing.

Advanced Placement Calculus AB – MA04201 – 2 credit, year-long course, AP level. Open to students in grades 11, and 12. Prerequisites: Pre-Calculus with Limits (H) with an expected minimal final grade of B. A graphing calculator is required. The TI-89 is highly recommended if the student plans on taking the Advanced Placement Exam. This course prepares students for the Calculus AB Advanced Placement Exam. Calculus covers the introduction and application of the concepts of a function’s limits, derivatives, and integrals of a function. Real-valued functions are used and applied to model theoretical and realistic situations, and completes the application of integration. The course introduces differential equations and explores slope fields.

Course outcomes and expectations are:

- Apply the limit concept process to Difference Quotients, Riemann Sums and other functions
- Create functions that model real world and theoretical situations
- Apply differential calculus to solve theoretical and real world problems
- Compute the value of the definite integral to solve theoretical and real world problems
- Apply appropriate technologies to investigate and confirm calculus concepts/applications
- Communicate about the applications and concepts of calculus orally and in writing.
- Become familiar with the format and grading system of the AP exam
- Complete and review model AP exam questions
- Apply appropriate technologies to investigate and confirm the notions of calculus as defined by the Advance Placement syllabus

Advanced Placement Calculus BC – MA04301 – 2 credit, year-long course, AP level. Prerequisites: Pre-Calculus with Limits (H) with an expected minimal final grade of B. This course prepares students for the Calculus BC Advanced Placement Exam. A graphing calculator is required. The TI-89 is highly recommended if the student plans on taking the Advanced Placement Exam. This course is an advanced collegiate-based theoretical course that includes all the concepts and procedures of Calculus AB plus the additional content tested on the BC exam including more advanced integration techniques, work with sequences and series, Taylor polynomials, and calculus techniques applied to parametric, polar and vector functions.
Course outcomes and expectations are:

- Apply the limit concept process to Difference Quotients, Riemann Sums and other functions
- Create functions that model real world and theoretical situations
- Apply differential calculus to solve theoretical and real world problems
- Compute the value of the definite integral to solve theoretical and real world problems
- Apply appropriate technologies to investigate and confirm calculus concepts/applications
- Communicate about the applications and concepts of calculus orally and in writing.
- Become familiar with the format and grading system of the AP exam
- Complete and review model AP exam questions
- Apply appropriate technologies to investigate and confirm the notions of calculus as defined by the Advance Placement syllabus
- Apply sophisticated calculus integration techniques to solve theoretical problems
- Use infinite series, elementary differential equations, and multi-variable calculus to solve theoretical and real world problems
- Apply appropriate technologies to investigate and confirm the notions of calculus as defined by the Advance Placement syllabus (BC LEVEL)

**Advanced Placement Calculus C – MA04401** – 1 credit, second semester only course, AP level. 
**Prerequisites:** AP Calculus AB with an expected minimal final grade of B. Description as above

**Skills For Test Taking – MI06100** – .5 credits, one quarter course, unlevelled. Open to students in grades 10, 11, and 12. Open to ALL levels. **Prerequisites:** Successful completion of Algebra I, Geometry, and English 9. A Texas Instruments TI-84 graphing calculator is required. This course is designed for students who wish to develop their test-taking skills for the PSAT, SAT and ACT tests. It is recommended that this course be taken in the same year a student is planning to take the PSAT, SAT, or ACT.

Course outcomes and expectations are:

- Identify and apply the significant numeric/algebraic/geometric concepts, procedures and problem solving to simulate the PSAT, SAT and ACT
- Increase vocabulary, develop focus-reading strategies, understand and construct analogies
- Identify specific test constructions and strategies that will be modeled in the PSAT, SAT and ACT
- Identify and discuss data that will help improve personal performances on simulated PSAT, SAT, and ACT

**Introduction to Programming for IOS – MA07000** – 1 credit, one semester course, unlevelled**. Open to all grades. **Prerequisite:** Successful completion of Algebra I. This course will provide students an opportunity to build and deploy iOS applications from end to end. Students will learn the basics of sequential and object-oriented programming, basic data structures, designing user interfaces, and gain a solid understanding of how an iOS app is constructed. They will learn how iOS applications are designed and developed, and use those skills to create complete working applications that run on iPads and iPhones.

**There will be an opportunity for students to earn honors level (H) credit for this course by completing additional coursework as assigned by the instructor.** Additionally, students may retake this course for credit to complete more advanced modules not reached in their first semester and to design and build original iOS apps.
Music Department

The music department provides a variety of activities and courses for all interested students, fosters the development of individual abilities, and offers ample opportunities for growth, understanding and expression through musical activities. Courses are scheduled so that any student can participate in any combination of BOTH instrumental and vocal ensembles. Students wishing to participate in any combination of band, orchestra, or chorus should enroll in the appropriate course as described. Certain students may compete for participation in district, regional and state performance festivals. Various groups are required to perform in school concerts and may be involved in school shows.

Band Offerings

Concert Band – MU01000 (Band Sectional for all instruments – MU01200) – 1 credit, year-long course, unlevelled. Open to students in ALL grades. Class meets Block 4, every other day. Prerequisite: Audition held in January for the following school year. Late entering students must audition. (Exact times and dates for band camp will be announced.) Participation in band is designed to develop a greater understanding of music through study and performance of a wide variety of band literature. Required performances include football games, parades, pep rallies and concerts.

Course outcomes and expectation are:

- Perform moderately difficult music at marching band events and concerts
- Demonstrate an understanding of musical concepts through listening and critiquing
- Compose and perform music in class based on practiced musical excerpts

Band Concentration – MU01100 (Band Sectional for brass and woodwinds – MU01200, Percussion Sectional for percussionists – MU03100) - 2 credit, year-long course, unlevelled. Open to ALL grades. Class meets Block 4 every day. This course includes all participation and performance responsibilities for the concert band and wind ensemble. Open to wind ensemble members who are not in the chamber singers. Course outcomes are the same as concert band and wind ensemble.

Jazz Ensemble – MU03000 – .4 credits, year-long course, unlevelled. Open to all grades. The class meets 2-3 times a week, after block 4. Some evening rehearsals are required. Prerequisite: Students must be a member of one of the High School major instrumental ensembles (String Orchestra, String Ensemble, Concert Band or Wind Ensemble. Selection is through audition only. Auditions are held in May/June of the previous school year. Topics of study for this course include a wide range of musical styles related to the jazz idiom. Performances include concerts, festivals and competition.

Course outcomes and expectations are:

- Perform advanced jazz literature
- Improvise as a soloist in a variety of jazz styles
- Participate in all concerts and festivals
- Demonstrate an understanding of musical concepts through listening and critiquing
**Wind Ensemble – MU05000 (Band Sectional for brass and woodwinds – MU01200, Percussion Sectional for percussionists – MU03100)** – 1 credit, year-long course, **unleveled**. Open to students in ALL grades. Class meets Block 4, every other day. **Prerequisite: Selection is through audition only.** Group instrumentation is based on standard wind ensemble instrumentation and may change slightly from year to year based on qualifications of those who audition. Students who are not selected for the wind ensemble will have the opportunity to participate as a member of the concert band. Attendance at band camp prior to the opening of school in the fall and participation in the marching band at football games and community events is required. Participation in wind ensemble is designed for exemplary musicians to develop a greater understanding of music study and performance of a wide variety of advanced band literature.

Course outcomes and expectations include:
- Perform moderately difficult to advanced ensemble music at marching band events and concerts
- Perform advanced chamber ensemble literature at a recital
- Demonstrate an advanced understanding of musical concepts through listening and critiquing
- Compose and perform music in class based on practiced musical excerpts

**Competition Marching Band - No credit.** Open to all students. Students who are not Concert Band or Wind Ensemble members must pass an audition. **Prerequisite: Attendance at band camp prior to the opening of school in the fall (Exact times and dates to be announced.)

Outcomes and expectations are:
- Compete with other school bands by performing an intricate marching field drill and playing challenging music
- Demonstrate the simultaneous responsibilities of playing music and marching
- Show proper posture, instrument carriage and movement technique
- Perform with poise at a high level of excellence at all times

**Chorus Offerings**

**Chamber Singers – MU02000 (Chamber Singers Sectional – MU02100)** – 1 credit, year-long course, **unleveled**. Open to grades 10, 11 and 12. Class meets Block 4, every other day. **Prerequisite: Audition held in January for the following school year. Late entering students must audition.** This is a select choral ensemble, which maintains a high level of musicianship. A commitment to musical excellence and communication is required for this program of choral technique and literature. The course provides opportunities for solo and small ensemble experiences. Poise and stage presence are emphasized. The goal of this course is to develop advanced choral singing techniques and to perform appropriate major choral chamber music. It is expected that members will be available for community concert performances in addition to the six major choral concerts. An activity fee is assessed annually for uniform maintenance and music folder.

Course outcomes and expectations are:
- Develop and perform with advanced vocal/choral skills
- Develop poise in performance
- Research the style, period, and foreign language of the music being studied
- Perform advanced chamber music
- Compete for positions in Pennsylvania Music Educator Association festival choruses.
**Music**

**Concert Chorale – MU02200 (Chorale Sectional – MU02400)** – 1 credit, year-long course, **unleveled.** Open to ALL grades. Class meets Block 4, every other day. You must sign up for both MU02200 and MU02400 to receive credit. **Prerequisite: Audition held in January for the following school year. Late entering students must audition.** The goal of this course is to develop the basic vocal technique and choral ensemble skills necessary to perform major choral works. Students are required to sing in six major concerts per year. An activity fee is assessed annually for uniform maintenance and music folder.

Course outcomes and expectations are:
- Apply techniques learned to choral literature from all styles and periods
- Develop a commitment to excellence in choral performance and concert presence
- Compete for positions in Pennsylvania Music Educators Association (PMEA) festival choruses (grades 10, 11 and 12)
- Participate in social and creative events arranged by the Student Choral Council
- Develop communication skills which enhance other areas such as musical theater and drama

**Choral Concentration – MU02300 (Chamber Singers Sectional – MU02100)** – 2 credit, year-long course, **unleveled.** Open to ALL grades. Class meets Block 4 every day. This course includes all participation and performance responsibilities for the Concert Chorale and Chamber Singers. Open to Chamber Singers who are not in Wind Ensemble or String Ensemble.

Course outcomes and expectations are:
- Build musicianship by increasing vocal stamina
- Develop leadership skills by assisting director with small group sectionals
- Learn Music administration skills by filing music correctly and assisting in program writing

**String Offerings**

**String Orchestra – MU04000 (String Sectional – MU04300)** – 1 credit, year-long course, **unleveled.** Open to students in ALL grades. Class meets Block 4 every other day. **Prerequisite: Auditions held in January for the following school year. Late entering students must audition.** Students are eligible to audition for participation in Pennsylvania Music Educators Association (PMEA) orchestra festivals and may perform in various chamber ensembles. Students must be enrolled in BOTH MU04000 and MU04300.

Course outcomes and expectations are:
- Study and perform a variety of literature in concerts throughout the year
- Develop appropriate conduct of a musician or as an audience member
- Demonstrate technical proficiency on a stringed instrument
- Recognize and critically listen to various works of orchestra literature

**String Ensemble – MU04100 (String Sectional – MU04300)** – 1 credit, **unleveled.** Open to grades 10, 11, and 12**. Class meets Block 4 every other day. Students must be enrolled in both MU04100 and MU04300 to receive credit. **Prerequisite: Selection is through audition only. **9th Grade students may audition in special cases approved by the director.”
Course outcomes and expectations include:

- Study and perform a variety of literature in concerts throughout the year
- May perform in various chamber ensembles
- Develop appropriate conduct of a musician or of an audience member
- Demonstrate technical proficiency on a stringed instrument
- Recognize and critically listen to various works of orchestra literature

Students are eligible to audition for participation in PMEA orchestra festivals and may perform in various chamber ensembles.

**String Concentration – MU04200 (String Sectional – MU04300)** – 2 credit, year-long course, **unleveled**.

Open to grades 10, 11, and 12. Class meets Block 4 every day. Course outcomes and expectations are the same as above. This option is open to String Ensemble members who are not in Chamber Singers.

**Instrumental/Choral Combination Offerings**

One credit, year-long course. Open to students in ALL levels. Open to all grades. Class meets Block 4, every other day. **Prerequisites: Year-end grade of “B” or better in both instrumental and choral music from the previous year in Haverford School District. Late entering students must audition. Permission from each of the appropriate ensemble directors must be obtained before registering for a combination course.**

Students will participate in all of the events for the following possible combination of courses:

- MU06000 Concert Band and Chamber Singers
- MU06100 String Ensemble and Concert Chorale
- MU06200 String Orchestra and Chamber Singers
- MU06300 Wind Ensemble and Concert Chorale

Students will attend each of their choral and instrumental ensemble rehearsals daily, splitting the block equally between the two. Students are responsible for all coursework and information disseminated in each choral and instrumental rehearsal. Quarterly grades will be determined by averaging the separate choral and instrumental grades as determined by the respective directors.

See the course descriptions for the requirements and course outcomes of the individual ensembles. Students are also required to register for the choral and instrumental sectionals appropriate to the ensembles in which they plan to participate.

Students participating in the choral and instrumental programs simultaneously in the format detailed above may register for their choral ensemble in one semester and their instrumental ensemble in the remaining semester if they wish to have each course listed on their course transcript separately, rather than using the Instrumental/Choral Concentration course designation. Quarterly grades will be determined as detailed above, regardless of which course title is listed.
Sectionals

Sectional Rehearsals - .2 credit for each sectional. These sectional rehearsals are required for courses as described above. They meet one day a week after Block 4. Sectionals are graded on a pass/fail basis. Students are evaluated and receive specialized instruction in a smaller group setting. Students cannot receive credit for, nor be enrolled in, a sectional unless enrolled in the corresponding course. Course outcomes and expectations are the same as above.

MU01200  Band Sectional  
MU02100  Chamber Singers Sectional  
MU02400  Chorale Sectional  
MU03100  Percussion Sectional  
MU04300  Strings Sectional  
MU05100  Orchestra Winds Sectional (by audition and based on instrumental balance needs of a symphony orchestra as directed by the musical selection) Open to grades 9,10, 11 and 12.

Music Electives

Digital Recording 1 – MU07100 – .5 credits, one quarter course, unlevelled. Open to ALL grades. No prerequisite. This course is designed for the student who has little or no experience in the area of digital recording. Students will use Audacity and GarageBand software. Learn how to place microphones, create professional quality digital recordings, mix audio, and upload completed projects to the internet using music production software on the computer.

Course outcomes and expectations are:

- Develop an understanding of the basic concepts of digital recording/editing
- Demonstrate an understanding of microphones and placement for live recording
- Mix an audio recording using digital audio software
- Create beats using loops, MIDI, and audio
- Upload completed projects and songs to the internet

[Digital Recording 1 ~ Alternate Day – MU07150 - .5 credits, every other day for one semester, unlevelled. Same course description as above. This course is designed for music students but is an option for all students.]

Digital Recording 2 – MU07200 – .5 credits, one quarter course, unlevelled. Open to ALL grades.

Prerequisite: Digital Recording 1. This course may be taken more than once for credit. This course will go beyond the basics of Digital Recording 1. Student will gain in-depth knowledge of microphones, mixers, CD burning, the electronic keyboard, and professional music software. Students will use Logic Pro music production software on the computer.

Course outcomes and expectations are:

- Develop an understanding of advanced digital recording concepts
- Demonstrate an understanding of microphones and placement for recording specific instrument such as drums, guitar, bass, and horns
- Mix a professional audio recording using music production software
- Create beats using a drum machine, the electronic keyboard, loops, MIDI, and audio
- Create real-world projects such as a movie soundtrack and radio commercial
- Upload completed projects and songs to the internet
The History of American Popular Music – MU07500 – .5 credits, one quarter course, unlevelled. Open to students in ALL grades. *No prerequisite.* This course surveys the chronological history and development of the popular music industry from the late 19th Century through the present. Popular styles studied range from Tin Pan Alley song charts, and the blues to early rock and roll, funk, disco, and punk. Students will also learn to recognize and analyze the musical mechanics of rock songs from all eras and study the events that influenced the most talented performers, producers, managers, and composers of popular music through the decades.

Course outcomes:
- Demonstrate knowledge of the styles of Rock music through tests, essays and class discussion
- Analyze representative pieces of music from each Rock era
- Analyze the social and cultural impact on specific Rock styles
- Create a final project that demonstrates the student's understanding of one or more specific areas of pop music
- Keep a notebook of topics covered through lecture and readings from the textbook

Musicianship 1: Piano Lab – MU08100 – .5 credits, one quarter, unlevelled. Open to all grades. No prerequisite. This class meets in the music lab. This course is designed for the student with little or no experience playing the piano. Students will learn to play melody and chords on the piano keyboard and to read basic music notation. This course may be taken as a prerequisite to Musicianship 2: Basic Music Theory.

Course outcomes and expectations are:
- Develop an understanding of piano music notation and learn to read basic notes and rhythm patterns
- Perform several songs in a variety of styles
- Improvise basic accompaniment patterns

Musicianship 2: Basic Music Theory – MU08200 – .5 credits, one quarter, unlevelled. Open to all grades. This class meets in the music lab. *Prerequisite: A grade of C or better in Musicianship 1: Piano Lab MU08100, Musicianship 1: Guitar Lab MU08400 or a demonstration of piano competency by playing the pieces on pages 58 & 59 of the Musicianship 1 text.* See Mr. Hart for further details.

Students will learn how to write basic songs including melody and chords. The fundamentals of music theory such as the reading and writing of basic music notation, scales and key signatures are an integral part of this course. Entry-level music theory and music notation software are used extensively. There is also use of electronic keyboards. Students requesting permission for entry into the Musicianship sequence at this level are required to demonstrate knowledge and skills consistent with the successful completion of Musicianship 1: Piano Lab MU07300. This course may be taken as a prerequisite to Musicianship 3: Advanced Music Theory and Composition.

Course outcomes and expectations are:
- Develop an understanding of the basic elements of music theory and notation.
- Demonstrate an understanding of music theory concepts through testing.
- Compose melodies using music notation software.
- Write an original song.
Musicianship 3: Advanced Music Theory and Composition – MU08300 – .5 credits, one quarter, un leveled. This class meets in the music lab. Prerequisite: A grade of C or better in Musicianship 2: Basic Music Theory MU08200, a B or better on the Basic Music Theory competency exam, and a demonstration of piano proficiency as described in the prerequisites for Musicianship 2. See Mr. Hart for details.

This course is designed for the student with an intermediate to advanced understanding of musical concepts. Students will be given the opportunity to write a variety of musical compositions and perform them using Electronic MIDI keyboards. There is extensive use of music notation and sequencing software, electronic keyboards, and MIDI technology.

Course outcomes and expectations are:
- Develop an understanding of harmonic structures and intermediate/advanced elements of music theory.
- Demonstrate the ability to write single and multi-part original musical compositions using music notation software and MIDI systems.

Courses Offered on Alternate Day (A/B) Schedule For Music Students

The chart below lists courses that may be offered on an alternate day (A/B) schedule to complement music classes. (May be selected by non-music students as well.)

Physical Education/Health Department

All students graduating from Haverford High School should be able to demonstrate life management skills by setting goals and priorities in their personal lives and by implementing a plan for physical and mental health. The following courses were designed to meet these life-long goals.

All students must take and pass a minimum of three .5 credit courses during their high school career. The typical sequence of courses would be a physical education course taken in the freshman year, Health Education in the sophomore year, and an additional physical education course taken at any time freshman through senior year.

All students are required to have sneakers and should be prepared for activity on their first physical education class day.

Course Descriptions

Physical Education for 9th Grade Students – PE00900 – .5 credits, one quarter course, *unleveled*. Class meets four days a week in the gym and one day a week in the fitness center. **Open to grade 9 only.** Proper dress is required to participate in this class. Areas of concentration will be physical fitness activities, competitive games, and recreational games. Activities may include but are not limited to the following: soccer, touch football, pickleball, badminton, volleyball, ultimate Frisbee, and floor hockey. Throughout the course students will work to improve their cardiovascular endurance and overall muscular strength and endurance. At least one day a week will be dedicated to cardiovascular endurance training by running 1-2 miles. Students will be required to learn the muscles of the body and have a basic understanding for developing a strength training and cardiovascular workout routine. Various field trips may require a nominal fee. Students will also participate in *Fitnessgram* fitness testing. A written final will be given upon completion of the course.

[Physical Education for 9th Grade Students ~ Alternate Day – PE00950 – .5 credits, one semester course, *unleveled*. This course meets every other day. Course description is the same as above.]

Health for 10th Grade Students – PE01000 - .5 credits, one quarter course, *unleveled*. Students will participate in health education five days a week. Units that are covered in this class include Mental Health, Nutrition, First Aid & CPR, Alcohol Education, Drug Education, and Human Sexuality and Communicable Disease Education.

[Health for 10th Grade Students ~ Alternate Day – PE01050 – .5 credits, one semester course, *unleveled*. This course meets every other day. This course is designed for music students but is an option for all students. Course description is the same as above.]

**After the completion of the above courses,** students can choose to take one or more of the Physical Education electives listed below. At least one additional Health and Physical Education course is necessary to fulfill graduation requirements.
Physical Education Electives

General Physical Education – PE02000 – .5 credits, one quarter course, unleveled. Students will participate in physical education class 5 days a week. This course will address individualized, team and fitness activities. Proper dress is required. Areas of concentration will be physical fitness activities, competitive games, and recreational games. Various field trips may require a nominal fee. Students will also participate in Fitnessgram fitness testing.

[General Physical Education ~ Alternate Day – PE02050 – .5 credits, one semester course, unleveled. This course is designed for music students but is an option for all students. Course description is the same as above.]

Lifetime Fitness – PE02100 – .5 credits, one quarter course, unleveled. Students will participate in physical activities 5 days a week. Proper dress is required. Students will gain knowledge of health-related components of fitness including:
- Cardiovascular endurance
- Muscular strength
- Flexibility
In addition, students will gain a better understanding of lifetime sports. These include but are not limited to baseball, basketball, volleyball, tennis, and badminton. Basic skills and regulations will be taught at this level. Finally, students will also learn the importance of maintaining good nutrition and appropriate dietary intake throughout their lives. Various field trips may require a nominal fee. Students will also participate in Fitnessgram fitness testing.

Fitness/Weight Training – PE02200 – .5 credits, one quarter course, unleveled. Class meets 4 days a week in fitness center and 1 day in the gym. Proper dress required. Students will design an individual fitness program that they will be able to incorporate into their lifelong wellness behaviors. Exercise will focus on toning, strengthening and conditioning the entire body. To achieve these goals, student use Nautilus and Universal equipment, weights, stationary bikes and other exercise apparatus. Students will also participate in Fitnessgram fitness testing.

Physical Education Concentration – PE02300 - .5 credits, one quarter course, unleveled. This class meets 4 days a week in the gym and one day a week in the classroom. Proper dress is required. This course is designed for students, who enjoy physical activity, are athletic, and who desire a higher level of competition. Students will also participate in Fitnessgram fitness testing. Course includes:
- Competitive gym activities
- A variety of classroom subjects including philosophy, sport psychology, motivation and goal setting
- Various field trips may require a nominal fee

Health and Wellness – PE04000 – .5 credits, one quarter, unleveled. Open to 11th and 12th grade students only. Class meets five days a week. The course will cover issues related to health decision-making throughout one’s lifetime. Guest speakers and field trips will be incorporated into the course where appropriate. Various field trips may require a nominal fee. Topics may include but are not limited to the following:
- Human Sexuality/Relationships
- Consequences of Drug/Alcohol Use
- Nutrition and Wellness

**Students who do extremely well in Honors science classes, and are independently motivated, may petition their counselor and teacher for approval to take the AP version of Chemistry and/or Biology instead of the first level course.**
Inquiry into the Physical Setting (H) – SC01001 – 1 credit, one semester course, honors level. IPS is the 9th grade selection in the recommended core curriculum sequence. Requisite: Must also be enrolled in MA00901, Algebra I (H). With a focus on Science, Technology, Engineering and Math (STEM), this course is designed to challenge the most capable science students and to develop critical and analytical thinkers. Instruction is focused on an inquiry, problem-solving course connected to rich and dynamic exploration of real world learning. All levels, while addressing the needs and abilities of different students, is divided into the following major concept areas:

- Forces and Motion - includes concepts such as Newton’s Three Laws of Motion, and weight. An application of motion is studied through real world experiences (ex. Roller coaster rides)
- Energy - includes concepts such as potential and kinetic energy, simple and parallel circuits, and power
- Waves - includes properties of waves focusing on concepts such as wavelength, frequency, pitch; types of waves such as sound; spectra. Students will demonstrate knowledge through production of sound and light shows
- Electricity and Magnetism – includes building circuits, working with computer simulations, and designing energy efficient, renewable energy homes that focus on sustainability

The integration of the PASCO technology and computer software program is an integral component of the coursework for a complete implementation of the PA Science and Technology Standards. Assessments at all levels include Projects framed as end of the chapter Challenges, tests, activities, What Do You Think journal writing and ‘Physics to Go’ reflection questions.

Inquiry into the Physical Setting (A) – SC01002 – 1 credit, one semester course, college prep level. IPS is the 9th grade selection in the recommended core curriculum sequence. This course provides thorough academic preparation through project oriented activities. Same description as above. Requisite: Must also be enrolled in MA00902 - Algebra I (A), MA00010 – Mathematics I, or MA00090 – Mathematics 9 (Supplemental).

Biology (H) – SC03101 – 1 credit, one semester course, honors. Open to students in grades 9, 10, 11 and 12. Prerequisite: IPS. Biology is the second course in the required core curriculum sequence. This introductory course focuses on the concepts of life processes. Concepts include energy flow, structure and function, reproduction, genetics, evolution, ecology, taxonomy and organisms. The course emphasizes the similarities among organisms at a variety of organizational levels.

Students are expected to:

- Participate in and contribute to group and individual activities such as labs, modeling, problem solving, data collection and organization and written reports
- Apply scientific processes to classroom activities and everyday life
- Explore careers in life sciences
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards
Biology – SC03102 – 2 credit, year-long course, college prep level. Open to students in grades 9, 10, 11 and 12. Prerequisite: IPS. Biology is the second course in the required core curriculum sequence. This introductory course focuses on the concepts of life processes. Concepts include energy flow, structure and function, reproduction, genetics, evolution, ecology, taxonomy and organisms. The course emphasizes the similarities among organisms at a variety of organizational levels.

Students are expected to:
- Participate in and contribute to group and individual activities such as labs
- Demonstrate modeling, problem solving, data collection, organization and written reporting
- Apply scientific processes to classroom activities and everyday life
- Explore careers in life sciences
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards

Advanced Placement Biology – SC03201 – 2 credit, year-long course, AP level. Open to grades 11 and 12 (open to grade 10 with administrative approval). Prerequisites: IPS, Biology & Chemistry (Honors or college prep, with an expected minimum final grade of B). This course includes the study of basic and advanced knowledge of recent developments in the following topics: Cell biology, biochemistry, cell energetics, molecular genetics, heredity, evolution, organismal biology and ecology. Assessments include tests, quizzes, written lab reports, and oral presentations.

Course outcomes and expectations include:
- Apply learning to biological, ethical, and financial societal issues both present and future
- Participate in and contribute to group laboratory activities
- Produce oral and written reports related to specific course content
- Utilize various scientific tools: microscopes, stethoscopes, and chemical testing agents
- Employ technology to enhance learning and research

Chemistry (H) – SC02101 – 1 credit, one semester course, honors level. Open to students in grades 10, 11 and 12. Chemistry is the third course in the required core curriculum sequence. Prerequisite: IPS, Biology, Algebra I & Geometry (which may be taken concurrently). Instruction is focused on inquiry and problem solving, involving activities that relate to real life applications and experiences. The nature of the course requires students to continually revisit fundamental chemistry principles throughout the semester, extending their understanding and applying these concepts in new context. All levels, while addressing the needs and abilities of different students, is divided into the following major concept areas:

Course outcomes and expectations include
- Structure of Matter – atomic structure, bonding, organic and biochemistry
- Physical & Chemical Properties of elements & compounds
- Energy Sources & Transfer of Heat – chemical reactions, laws of conservation of energy and matter, gas laws, electrochemistry, oxidation-reduction and stoichiometry
- Integration of the PASCO technology and computer software for a complete implementation of the PA Science and Technology Standards

Assessments at all levels include authentic end of the unit projects, written lab reports, group analysis problems or data, quizzes, tests and final exam.
Chemistry – SC02102 – 1 credit, one semester course, **college prep level.** Open to students in grades 10, 11 and 12. Chemistry is the third course in the required core curriculum sequence. **Prerequisite: IPS, Biology, Algebra I & Geometry (which may be taken concurrently).** This course is divided into the following major concept areas:

Course outcomes and expectations include:
- Structure of Matter – atomic structure, bonding, organic and biochemistry
- Physical & Chemical Properties of elements & compounds
- Energy Sources & Transfer of Heat – chemical reactions, laws of conservation of energy and matter, gas laws, electrochemistry, oxidation-reduction and stoichiometry
- Integration of the PASCO technology and computer software for a complete implementation of the PA Science and Technology Standards

Assessments at all levels include authentic end of the unit projects, written lab reports, group analysis problems or data, quizzes, tests and final exam.

Chemistry – SC02103 – 1 credit, 1 semester course, **career track level.** Open to students in grades 10, 11 and 12. For students who may have not met the Algebra I math requirement and need the required course for graduation. **Prerequisite: IPS, Biology.** Topics include atomic and molecular theory, physical and chemical properties of elements and compounds, acid/base theories, and the conservation of matter and energy. Assessments will include tests, quizzes, and written reports. Portfolio projects are performed during the semester demonstrating knowledge of principles to include: determination of physical properties, determination of atomic structure, identification of unknown substances, or the presentation of a survey of selected topics.

Course outcomes and expectations include:
- Demonstrate an understanding of the basic concepts of chemistry including: atomic structure, physical and chemical properties of elements and compounds, the mole, stoichiometry, chemical bonding, energy relationships, acids and bases, oxidation-reduction, and gas laws
- Apply chemistry to everyday situations and environmental/ecological concerns
- Complete lab activities and prepare formal written reports communicating the methods, procedures, analyses and results of laboratory investigations
- Demonstrate the ability to carry out multi-step problem
- Employ scientific method in analyzing chemical and physical phenomena
- Make hypotheses and use accepted Laws of chemistry and physics to explain chemical and physical behaviors of matter

Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards.

Advanced Placement Chemistry — SC02201 – 2 credit, year-long course, **AP level.** Open to grades 11 and 12. **Prerequisites: Chemistry (H) (SC02101), Algebra II.** A scientific calculator is required. This course expands on and uses, in greater depth, all of the basics learned in Chemistry I; such as atomic theory, kinetic molecular theory, and the conservation of matter and energy to demonstrate the structure of matter, periodicity, bonding, stoichiometry, gas laws, chemical equilibrium, kinetics, physical and thermal chemistry, oxidation/reduction reactions, organic and biochemistry, nuclear chemistry, and electrochemistry.
Course outcomes and expectations include:

- Demonstrate the ability to perform complex multi-step college-level problems involving abstract concepts and requiring advanced manipulations with a scientific calculator
- Predict equations for a variety of different types of chemical reactions
- Extrapolate chemical phenomena (both through the use of mathematical equations as well as through descriptive chemistry) if given data or collected data via experimentation.
- Develop and perfect techniques of manipulating various laboratory instruments and apparatus in performing advanced experiments, and write comprehensive reports on these experiments effectively communicating information to others in both written and oral form
- Apply chemistry concepts to a variety of everyday situations involving environmental and ecological awareness
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards

Assessments include tests, labs with extensive written reports, quizzes, research project, extensive homework assignments, and a final examination.

**Forensic Chemistry – SC02400** – 1 credit, one semester course, **unleveled.** Open to grades 11 and 12. **Prerequisites: Completion of IPS, Biology and Chemistry.** A challenging course for the student interested in the scientific crime detection methods used by crime laboratories. This course is focused on the Science, Technology, Engineering and Math (STEM) initiatives and is designed to challenge the most capable science students and to develop critical and analytical thinkers. Instruction is focused on an inquiry, problem-solving course connected to rich and dynamic exploration of real world learning. The emphasis will be on chemical principles and laboratory techniques with reference to biological and physical evidence.

Course Outcomes & Expectations

- Demonstrate a basic understanding of organic and biochemistry as applies to forensics
- Develop & apply lab skills in organic and inorganic analysis used in forensics as chromatography, spectroscopy, and extractions. Includes the integration of PASCO technologies
- Develop scientific literacy by reading and researching case histories
- Opportunities for interaction with professionals in the field of forensics

**Anatomy & Physiology (H) – SC04101** – 1 credit, one semester course, **honors level.** Open to students in grades 11 and 12. **Prerequisites: IPS, Biology, and Chemistry (Honors or college prep with a minimum grade of C).** Topics include: cell and tissue structure; and integumentary, skeletal, muscular, digestive, cardiovascular, and reproductive systems. Course assessments include: tests, quizzes, laboratory work, written and oral reports, laboratory practicals, and a final examination.

Course outcomes and expectations include:

- Understanding and development of anatomical terminology as applied to clinical situations
- Discuss the interrelationships between structures and functions of the major organ systems and their microstructures
- Explain the importance of the body’s specialized functions, including protection, support, movement, integrative ability, coordination, processing, transporting, and reproduction
- Demonstrate an understanding of course content through laboratory investigations (including dissection), tests, quizzes, and class work
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards
Anatomy & Physiology – SC04102 – 1 credit, one semester course, college prep level. Open to students in grades 11 and 12. Prerequisites: IPS, Biology, and Chemistry (Honors or college prep with a minimum grade of C). Topics include: cell and tissue structure; and integumentary, skeletal, muscular, digestive, cardiovascular, and reproductive systems. Course assessments include: tests, quizzes, laboratory work, written and oral reports, laboratory practicals, and a final examination.

Course outcomes and expectations include:

- Understanding and development of anatomical terminology as applied to clinical situations
- Discuss the interrelationships between structures and functions of the major organ systems and their microstructures
- Explain the importance of the body’s specialized functions, including protection, support, movement, integrative ability, coordination, processing, transporting, and reproduction
- Demonstrate an understanding of course content through laboratory investigations (including dissection), tests, quizzes, and class work
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards

Biotechnology – SC04200 – 1 credit, one semester course, unlevelled. Open to students in grades 11 and 12. Prerequisites: Successful completion of IPS, Biology, and Chemistry. This course is another in the strand focused on the Science, Technology, Engineering and Math (STEM) initiative. Instruction is focused on an inquiry, problem-solving course connected to rich and dynamic exploration of real-world learning. Concepts introduced in this course will include laboratory safety, instrument calibration, DNA form and function, manipulation of DNA, cell transformation, and applications of genetic engineering. Laboratory techniques introduced may include DNA extraction using restriction enzymes, horizontal gel electrophoresis, polymerase chain reaction, bacterial transformation, protein purification by chromatography, protein analysis by comparative spectroscopy, and vertical gel electrophoresis. The following technology used in this course will be the Fischertechnik kits and PASCO probeware. Students interested in exploring careers such as forensics, genetics, and genetic engineering should consider this course.

Environmental Science (H) – SC04301 – 1 credit, one semester course, honors level. Open to students in grades 11 and 12. Prerequisite: IPS, Biology, and Chemistry (Honors or college prep) with a minimum grade of C. Topics include basic principles and concepts of the structure and functions of a variety of ecological systems and their interconnectedness with social and economic systems to achieve global sustainability. Assessments include tests, quizzes, and laboratory work including on-site fieldwork at a local stream, and a final examination. The subjective portion will include a three-day laboratory experience to be completed during the semester.

Environmental Science – SC04302 – 1 credit, one semester course, college prep level. Open to students in grades 11 and 12. Prerequisite: IPS, Biology, and Chemistry (Honors or college prep). Topics include basic principles and concepts of the structure and functions of a variety of ecological systems and their interconnectedness with social and economic systems to achieve global sustainability. Assessments include tests, quizzes, and laboratory work including on-site fieldwork at a local stream, and a final examination. The subjective portion will include a three-day laboratory experience to be completed during the semester.

Marine Ecology (H) – SC04401 – 1 credit, one semester course, honors level. Open to students in grades 11 and 12. Prerequisites: IPS, Biology, and Chemistry. Marine ecology is the scientific study of marine life, habitats, populations and interactions between organisms and their environment. This includes all factors that may contribute to the development of these various interactions, both biotic and abiotic.
Instruction will focus on three big ideas.

- The Ocean as a Habitat - topics include the formation of our ocean basins to the currents that circulate needed nutrients
- Human Intervention in the Sea - topics include the effects of resource harvest and water pollution on the overall sustainability of the ocean.
- The Diversity of Living Things - topics include a taxonomic journey through the life at sea as we classify the diversity of living things.

**Marine Ecology — SC04402** — 1 credit, one semester course, **college prep level**. Open to students in grades 11 and 12. **Prerequisites: IPS, Biology, and Chemistry.** Marine ecology is the scientific study of marine life, habitats, populations and interactions between organisms and their environment. This includes all factors that may contribute to the development of these various interactions, both biotic and abiotic.

Instruction will focus on three big ideas.

- The Ocean as a Habitat - topics include the formation of our ocean basins to the currents that circulate needed nutrients
- Human Intervention in the Sea - topics include the effects of resource harvest and water pollution on the overall sustainability of the ocean.
- The Diversity of Living Things - topics include a taxonomic journey through the life at sea as we classify the diversity of living things.

**Advanced Placement Environmental Science I — SC04501** — 1 credit, first semester only course, **AP level**. Open to Grades 11 and 12. **Prerequisites: IPS, Biology, and Chemistry.** Students must be prepared to work outdoors for many of the labs. Examples of advanced topics included are: Interdependence of Earth’s systems, Renewable and Non-renewable resources, Environmental Quality, Global Changes and their Consequences, Environment and Society, and Choices for the Future. Assessments include tests, quizzes, and laboratory work including on-site fieldwork, and a final examination.

Course expectations and outcomes include:

- Apply the scientific method and ecological principles to everyday situations
- Participate in group laboratory activities
- Utilize various scientific tools and technology: PASCO probes and software, microscopes, water, air, and soil quality analysis kits
- Demonstrate an understanding of the material through laboratory and field experiences
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards

**Environmental Science II (H) — SC04601** — 1 credit, second semester only course, **honors level**. Open to grades 11 and 12. **Prerequisite: Advanced Placement Environmental Science I (SC04501) with an expected minimum final grade of B.** This course is an advanced collegiate – based theoretical course that extends the concepts, principles, and procedures of AP Environmental Science I. This course will further prepare students for success on the AP test. After the AP exam, students will focus on laboratory research.

Course expectations and outcomes include:

- Complete and review model AP exam questions
- Apply appropriate PASCO technologies to investigate and conform to the notions of ecology as defined by the Advanced Placement Syllabus
- Discuss applications and concepts of Ecology, both orally and in writing
**Physics (H) – SC04701**  – 1 credit, one semester course, **honors level**. Open to grades 11 and 12. **Prerequisites:** IPS, Biology, Chemistry, Algebra II (H) & Pre-Calculus (H) with an expected minimum final grade of B in each. Pre-Calculus (H) may be taken concurrently. **Scientific calculator is required.** This is an intensive laboratory based introductory physics course is recommended for anyone who plans to attend college and has an interest in science. The course surveys kinematics (the study of motion), dynamics (Newton's Laws and how forces affect motion), momentum, energy, electricity, magnetism, light, and sound. Assessments include tests, labs, quizzes, investigations, projects, reports, posters, problem solutions, event predictions and explanations. Students will solve problems using the physics relationships, laws, and concepts.

Course outcomes and expectations include:

- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the prediction using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Organize and solve problems using many of the physics relationships and concepts covered
- Apply physics to everyday situations
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards
- Complete/ build a project in which the laws of physics are demonstrated and discuss the relation of your project to these laws of physics

**Applied Physics – SC04702**  – 1 credit, one semester course, **college prep level**. Open to grades 11 and 12. **Prerequisites:** I.P.S., Biology, Chemistry & Algebra II (may be taken concurrently). **Scientific calculator is required.** This laboratory based, hands-on physics course with a focus on Science, Technology, Engineering, and Math (STEM) is recommended for anyone considering college and has an interest in science. Through the study and engineering of 4-5 major projects over the course of the semester, this course surveys kinematics (the study of motion), dynamics (Newton's Laws and how forces affect motion), momentum, energy, electricity, magnetism, light, and sound. Students will construct rockets to study motion, speakers and electric guitars to study electricity, magnetism, and waves, and trebuchets to study forces, torques, and energy. Assessments include tests, labs, quizzes, investigations, projects, reports, posters, problem solutions, event predictions and explanations. Students will solve problems using the physics relationships, laws, and concepts.

Course outcomes and expectations include:

- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the prediction using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Organize and solve problems using many of the physics relationships and concepts covered
- Apply physics to everyday situations
- Complete/ build a project in which the laws of physics are demonstrated and discuss the relation of your project to these laws of physics
- Integration of the PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards
Advanced Placement Physics C: Mechanics – SC04801 – 1 credit, one semester course, AP level.
Open to grades 11 and 12. **Prerequisites:** Physics (H) (SC04701) or AP Physics 1 (SC05101) with an expected minimum final grade of B, and AP Calculus AB ~ (MA04201) with an expected minimum final grade of ‘B’ in each. Scientific calculator required. This course will focus on the mechanics part of the Advanced Placement Physics Test "C" of the College Entrance Examination Board. The course includes equilibrium, kinematics, dynamics, work and energy, impulse and momentum, rotation, and periodic motion. Assessments will include: tests, labs, quizzes, investigations, projects, problem solutions, event predictions and explanations. Students will solve problems requiring the application of the laws of physics, relationships, and concepts including AP questions.

Course outcomes and expectations include:
- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the predictions using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Organize and solve problems using many of the physics relationships and concepts covered
- Apply physics to everyday situations
- Use computer simulations to examine how changing certain parameters can affect the outcome in a given situation, or how real life situations compare to ideal cases studied in class
- Integration of PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards

Advanced Placement Physics C: Electricity & Magnetism – SC05001 – 1 credit, one semester course, AP level. Open to grades 11 and 12. **Prerequisites:** AP Physics C - Mechanics (SC04801) and AP Calculus AB (MA04201) with an expected minimum final grade of B in each. Scientific calculator required. This course will focus on the electricity and magnetism part of the Advanced Placement Physics Test "C" of the College Entrance Examination Board. The course includes electrostatics, Gauss’s Law, electric circuits, magnetic fields and forces, electromagnetism, electromagnetic induction, and Maxwell’s equations. Assessments will include: tests, labs, quizzes, investigations, projects, problem solutions, event predictions and explanations. Students will solve problems requiring the application of the laws of physics, relationships, and concepts including AP questions.

Course outcomes and expectations include:
- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the predictions using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Organize and solve problems using many of the physics relationships and concepts covered
- Apply physics to everyday situations
- Use computer simulations to examine how changing certain parameters can affect the outcome in a given situation, or how real life situations compare to ideal cases studied in class
- Integration of PASCO technology and computer software program for a complete implementation of the PA Science and Technology Standards
Advanced Placement Physics 1 : Algebra-Based – SC05101 – 1 credit, one semester course, AP level. Open to grades 11 and 12. Prerequisites: IPS, Biology (H), Chemistry (H), Pre-Calculus (H) with an expected minimum final grade of B. Pre-Calculus (H) may be taken concurrently. Scientific calculator is required. This course provides a systematic development of the main principles of physics, emphasizing problem solving and helping students develop a deep understanding of physics concepts including Newtonian mechanics (including rotational dynamics and angular momentum); work, energy, and power; and mechanical waves and sound. It will also introduce electric circuits. AP Physics 1 provides a foundation in physics for students in the life sciences, pre-medicine, and some applied sciences. Assessments include: tests, labs, quizzes, investigations, projects, reports, problem solutions, event predictions and explanations.

Course outcomes and expectations include:
- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the prediction using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Apply physics to everyday situations
- Use computer simulations to examine how changing certain parameters can affect the outcome in a given situation, or how real life situations compare to ideal cases studied in class
- Integration of PASCO technology and computer software program

Advanced Placement Physics 2: Algebra- Based – SC05201 – 1 credit, one semester course, AP level. Open to grades 11 & 12. Prerequisites: Physics (H) or AP Physics 1, and Pre-Calculus (H) with an expected minimum final grade of B in each. Pre-Calculus (H) may be taken concurrently. Scientific calculator is required. This course provides a systematic development of the main principles of physics, emphasizing problem solving and helping students develop a deep understanding of physics concepts including fluid mechanics; thermodynamics; electricity and magnetism; optics; and atomic and nuclear physics. AP Physics 2 provides a foundation in physics for students in the life sciences, pre-medicine, and some applied sciences. Assessments include: tests, labs, quizzes, investigations, projects, reports, problem solutions, event predictions and explanations.

Course outcomes and expectations include:
- Perform lab investigations and write complete lab reports
- Make predictions and write complete justifications to show the reasoning behind the prediction using physics concepts
- Complete a project meeting minimum criteria using concepts covered
- Apply physics to everyday situations
- Use computer simulations to examine how changing certain parameters can affect the outcome in a given situation, or how real life situations compare to ideal cases studied in class
- Integration of PASCO technology and computer software program
Social Studies Department

All students in the School District of Haverford Township will work within the disciplines of history, geography, economics, political science, philosophy, sociology, psychology, government and law. All students will use the generally accepted operating procedures of social science research and presentation methodology to come to a reasoned, sophisticated understanding of their society and the world in which they live. All students will make informed decisions and seek to influence their peers for the betterment of society.

Freshman Social Studies Courses

Western Civilization (H) – SS01001 – 1 credit, one semester course, honors level. Usually taken in ninth grade. Students survey the development of modern Europe from the 1600s to the present with emphasis on the influence of European (western) culture on the other major cultures of the world. Requisite: Must also be enrolled in EN01001, English 9 (H).

Course outcomes and expectations are:
- Use creatively designed modes, role playing and simulations to interpret critical units and people associated with the evolution of modern European culture
- Use primary and secondary sources to develop and present class projects
- Conduct research into key areas of European history including the Enlightenment, Imperialism, the World Wars, and Globalism
- Complete extensive reading and writing work
- Maintain a portfolio of required work throughout the year

Western Civilization – SS01002 – 1 credit, one semester course, college prep level. Students cover the same content listed above. Requisite: Must also be enrolled in EN01002, English 9 (A).

Course outcomes and expectations are:
- Use creatively designed modes, role playing and simulations to interpret critical units and people associated with the evolution of modern European culture
- Use primary and secondary sources to develop and present class projects
- Conduct research into key areas of European history including the Enlightenment, Imperialism, the World Wars, and Globalism
- Complete extensive reading and written work
- Maintain a portfolio of required work throughout the year

Sophomore Social Studies Courses

World Cultures (H) – SS02001 – 1 credit, one semester course, honors level. Prerequisite: Successful completion of 9th grade social studies. Students will be scheduled for both English (H) and World Cultures (H) in the same semester. This course is an intensive study of non-European cultures designed to enhance the student’s appreciation of world diversity through the study of history, society, politics and religion. Students selecting this course should be highly motivated, possess an excellent academic background and the ability to read and understand advanced level sources.
Course outcomes and expectation are:

- Demonstrate in-depth knowledge of the historical development and contemporary issues of the five regions of study: Representative areas of South Asia, Asia, Africa, Middle East, and Latin America
- Develop an appreciation for the diversity of cultures within the regions of study
- Complete projects analyzing the impact of geography on the culture and economy of selected regions
- Evaluate and interpret primary sources integral to the philosophical foundations of selected regions
- Compare regions of study through written essays, debates, and other oral presentations

**World Cultures – SS02002 – 1 credit, one semester course, college prep level. Prerequisite: Successful completion of 9th grade social studies.** Students will be scheduled for both English and World Cultures in the same semester. This course encourages student to investigate the non-European cultures of Latin America, Africa, East Asia, South Asia, and the Middle East using their own society as a comparison. Students will be exposed to varying customs of different cultures.

Course outcomes and expectations are:

- Demonstrate an understanding of major historical events and current issues related to the five regions of study: Representative areas of Asia and Africa, the Middle East, Latin America.
- Demonstrate an understanding of the cultural diversity of the regions studied
- Complete projects examining the impact of geography, history and religion on the culture of selected regions
- Compare the culture of selected regions
- Demonstrate an understanding of the various cultures through written and oral presentation

**World Cultures – SS02003 – 1 credit, one semester course, career track level. Prerequisite: Successful completion of 9th grade social studies.** This course is the study of the diverse ways people live and their economic, religious, political and governmental activities. Selected non-European cultures are studied with a focus on today’s world and the major events in history that continue to have an impact on these regions. Speaking, writing and discussion skills will be emphasized throughout the course as well.

Course outcomes and expectations are:

- Demonstrate an understanding of selected events and issues related to the five regions of study: Representative areas of Asia and Africa, the Middle East, Latin America.
- Demonstrate an understanding of the cultural diversity of the regions studied
- Complete projects examining the impact of geography on the cultures of selected regions
- Compare regions of study through written and oral presentation.
- Complete a portfolio of selected student work throughout the duration of the course

**Advanced Placement World History – SS02101 – 2 credit, year-long course, AP level.** Open to grades 10, 11, and 12. Recommended for 10th grade honors students interested in an AP course. Satisfies the 10th grade social studies requirement. **Prerequisite: Successful completion of 9th grade honors social studies with a recommended minimum final grade of ‘B’.** Using chronological and thematic approaches, students survey the political, economic, social, and cultural development of Africa, the Americas, Asia and Europe, in preparation for the Advanced Placement (AP) World History exam. Major areas of study include early world civilizations, exploration, the Renaissance, Reformation and Enlightenment in Europe, political and industrial revolutions, 19th century nationalism and imperialism, 20th Century wars, and decolonization and globalization.
Course outcomes and expectations are:
- Understand the connections between chronology and cause/effect relationships on world regional development
- Describe major historical thoughts, trends, and events
- Recognize contributions art, literature, science, religion, and music have played in world regional development
- Evaluate world regional status and involvement in world affairs
- Be well prepared to take the A.P. exam in World History

Note to students in need of World Cultures credit: This course differs significantly from the World Cultures course. AP World History spans many more years of human history, takes a global rather than non-Western scope, emphasizes participation in the AP World History exam, and involves significantly more critical reading, writing, and discussion.

Junior Social Studies Courses

American History (H) – SS03001 – 1 credit, one semester course, honors level. Prerequisite: Successful completion of 10th grade social studies.

We all hope to achieve the American Dream, but what are its origins, and what challenges has it faced at home and from abroad? American History will tackle these questions with an emphasis on the 20th century in five units organized around the American Dream—its roots, its growth, challenges to it, war, groups that struggled to claim the American Dream, and the status of the American Dream today. We will examine what it means to live in a capitalist democracy, the origins of liberal and conservatism, the industrialization of the economy, the Progressive reaction to industrialization, society after World War II, the challenges of the Cold War as well as all of the conflicts the U.S. has fought since 1941, plus the major foreign policies.

Course outcomes and expectations are:
- Develop skills in critical reading, research, analysis, and writing while completing this course
- Demonstrate knowledge of basic chronology and major events
- Analyze and evaluate topics of major historical significance

American History – SS03002 – 1 credit, one semester course, college prep level. Prerequisite: Successful completion of 10th grade social studies.

We all hope to achieve the American Dream, but what are its origins, and what challenges has it faced at home and from abroad? American History will tackle these questions with an emphasis on the 20th century in five units organized around the American Dream—its roots, its growth, challenges to it, war, groups that struggled to claim the American Dream, and the status of the American Dream today. We will examine what it means to live in a capitalist democracy, the origins of liberal and conservatism, the industrialization of the economy, the Progressive reaction to industrialization, society after World War II, the challenges of the Cold War as well as all of the conflicts the U.S. has fought since 1941, plus the major foreign policies.

Course outcomes and expectations are:
- Develop skills in critical reading, research, analysis, and writing while completing this course
- Demonstrate knowledge of basic chronology and major events
- Analyze and evaluate topics of major historical significance
American History – SS03003 – 1 credit, one semester course, career track level. Prerequisite: Successful completion of 10th grade social studies.

We all hope to achieve the American Dream, but what are its origins, and what challenges has it faced at home and from abroad? American History will tackle these questions with an emphasis on the 20th century in five units organized around the American Dream—its roots, its growth, challenges to it, war, groups that struggled to claim the American Dream, and the status of the American Dream today. We will examine what it means to live in a capitalist democracy, the origins of liberalism and conservatism, the industrialization of the economy, the Progressive reaction to industrialization, society after World War II, the challenges of the Cold War as well as all of the conflicts the U.S. has fought since 1941, plus the major foreign policies.

Course outcomes and expectations are:
- Develop skills in critical reading, research, analysis, and writing while completing this course
- Demonstrate knowledge of basic chronology and major events
- Analyze and evaluate topics of major historical significance

Advanced Placement United States History – SS03101 – 1 credit, one semester course, AP level. Recommended for 11th grade honors students interested in an AP course. Open to grades 11 and 12. Prerequisite: Successful completion of 10th grade social studies honors level with a recommended minimum final grade of ‘B’. Satisfies the 11th grade social studies requirement. To be an American is to be descended from immigrants; to be part European, part, Africa, and part Indian; to have opportunities and always to face new challenges; to be an innovator and a capitalist; to have rights and responsibilities; to be a democrat and a republican; to have an inspiring heritage and to struggle to live up to that heritage; to have a past of greatness and an obligation to pass that heritage to the next generation.

Advanced Placement United States History will explore the story of America, from colonial beginnings through the creation of a nation and that growth of that nation—its politics, its economy, its territory, its spirit, and its culture—all the way to the present. Students will read and discuss a college level text, documents from the time, and scholarly articles. They will learn to research, to document, to analyze, and to write history. We will read selections American poetry, listen to American music, and examine great American art and architecture. We will learn the inspiring and the alarming sides of American history as well as how to recognize bias and how to think critically. Extra credit will be given for watching the best American movies outside class and then discussing them in class for the benefit of all.

Course outcomes and expectations are:
- Develop skills in critical reading, research, analysis, and writing while completing this course
- Demonstrate knowledge of basic chronology and major events
- Analyze and evaluate topics of major historical significance
- Be well prepared to take the A.P. exam in U.S. History

****************************************************

Senior Social Studies Courses

IN ORDER TO GRADUATE, SENIORS ARE REQUIRED TO HAVE COMPLETED A COURSE IN AMERICAN GOVERNMENT. THIS CAN BE FULFILLED WITH ADVANCED PLACEMENT UNITED STATES GOVERNMENT AND POLITICS (SS04001) OR AMERICAN CIVICS AND GOVERNMENT (SS04100) DESCRIBED AS FOLLOWS.
Advanced Placement United States Government and Politics – SS04001 – 1 credit, one semester course, AP level. Open to grades 11 and 12. AP United States Government and Politics is an advanced political science course. The course is divided into two main sections: how the political process works and how the U.S. government functions. Students will examine in depth the U.S. Constitution, public opinion, political parties, presidential and congressional elections, interest groups, and the mass media. In addition, they will learn about the three branches of government (legislative, executive, and judicial), their constitutional basis, and how they interact. Students will read a college-level textbook, develop their writing and test taking skills through written analysis of current events, and practice with AP-like test questions. All students will be required to write a letter to their congressional representatives and maintain a current events portfolio. The course is aimed at preparing those students interested in taking the AP United States Government and Politics exam in the spring, which would provide them with the opportunity to earn college credit while still in high school. Students who plan to take the AP exam should know that in order to do well on the AP exam, they also have to study on their own.

Course outcomes and expectations:
- Demonstrate a high level of understanding of the U.S. Constitution, its allocation of power, structure of government it created.
- Demonstrate an in-depth understanding of how the Legislative, Executive and Judicial branches function and interact as a federal system of government.
- Follow and analyze significant current news items and connect them to the areas of content studied in this course.
- Demonstrate a high level of understanding of the following topic areas: voting, voting systems, political parties, the media, the impact of money on elections, interest groups, and political campaign strategies. For each area, students will be familiar with the issue’s history as well as the role it plays in current politics.
- Demonstrate an understanding of the course’s content through taking practice AP exam essay and multiple choice questions.
- Be prepared to take the AP American Government exam.

[Advanced Placement United States Government and Politics ~ Alternate Day – SS04051 – 1 credit, year-long, every other day. Same description as above. This course is designed for students in the music program but is an option for all students. Offered in even years, e.g. 2012-13.]

American Civics and Government (H) – SS04101 – 1 credit, one semester course, unleveled. Open to grades 11 and 12. In this course, students will examine how both the American government and political system work. When studying how the U.S. government operates, students will learn about the U.S. Constitution, the division of power between local, state, and national government, and each of the three branches (legislative, executive, and judicial). The other component of the course allows students to understand the key parts of the political process; students will learn the differences between political parties, the election process for both presidential and congressional races, the influence of money in politics, the role of the media, and the influence of interest groups. All students will be required to write a letter to their congressional representatives and maintain a current events portfolio.
Course outcomes and expectations:
- Demonstrate an understanding of the U.S. Constitution and the structure of the U.S. governmental system it created.
- Demonstrate an understanding of how the Legislative, Executive and Judicial branches function and interact as a federal system of government.
- Follow and analyze significant current news items and connect them to the areas of content studied in this course.
- Understand how the government impacts daily life and how Supreme Court cases affect students’ and Americans’ civil rights and civil liberties.
- Demonstrate preparation for participation in democracy through registering to vote, learning the difference between political parties’ beliefs and understanding how U.S. voting systems work.
- Develop a sophisticated understanding of the strengths and shortcomings of mass media, and learn to differentiate between facts, values, and myths presented through the media and political campaigns.

**American Civics and Government – SS04100 – 1 credit, one semester course, unlevelled.** Open to grades 11 and 12. In this course, students will examine how both the American government and political system work. When studying how the U.S. government operates, students will learn about the U.S. Constitution, the division of power between local, state, and national government, and each of the three branches (legislative, executive, and judicial). The other component of the course allows students to understand the key parts of the political process; students will learn the differences between political parties, the election process for both presidential and congressional races, the influence of money in politics, the role of the media, and the influence of interest groups. All students will be required to write a letter to their congressional representatives and maintain a current events portfolio.

Course outcomes and expectations:
- Demonstrate an understanding of the U.S. Constitution and the structure of the U.S. governmental system it created.
- Demonstrate an understanding of how the Legislative, Executive and Judicial branches function and interact as a federal system of government.
- Follow and analyze significant current news items and connect them to the areas of content studied in this course.
- Understand how the government impacts daily life and how Supreme Court cases affect students’ and Americans’ civil rights and civil liberties.
- Demonstrate preparation for participation in democracy through registering to vote, learning the difference between political parties’ beliefs and understanding how U.S. voting systems work.
- Develop a sophisticated understanding of the strengths and shortcomings of mass media, and learn to differentiate between facts, values, and myths presented through the media and political campaigns.

*****************************************************************************

**Social Studies Electives**

**Economics – SS05002 – 1 credit, one semester course, college prep level.** Open to grades 11 and 12. This course will enable students to apply economic concepts to situations of personal, community and national interest. It meets the basic goals of the National Council for Economic Education, a group organized to promote economic literacy. Students are encouraged to become productive workers, responsible citizens, prudent savers and investors, effective participants in the national and global economies, knowledgeable consumers and life-long decision makers.
Course outcomes and expectations are:

- Demonstrate knowledge of the major concepts/generalizations that define economics
- Critically analyze the importance of entrepreneurship as a strategy to revitalize an economy, increase employment and stimulate world-wide productivity
- Develop a detailed understanding of financial markets and realistic long-term expectations of success in personal investment
- Understand the American free enterprise system and explore roles as citizens

**Advanced Placement Macroeconomics / Microeconomics**

A Macro/Micro cycle of AP Economics will introduce students to the entire discipline of economics allowing them to develop a detailed understanding and application of economic principles and analytical decision making skills essential for problem solving. The courses will be offered in alternating years (In 2014-15 AP Macroeconomics will be offered). Students are encouraged to become productive workers, responsible citizens, prudent savers and investors, effective participants in a global economy, knowledgeable consumers and life-long decision makers. If they so choose, students will have the opportunity to fully prepare for both Micro and Macro portions of the AP exam.

**Advanced Placement Macroeconomics – SS05101** – 1 credit, first semester only course, AP level. Open to grades 11 and 12. Macroeconomics will introduce the student to the national and international economy with special emphasis on how government actions influence the economy. The course will embed AP exam formats, evaluation of exam questions, use of AP rubrics and scoring systems. If they so choose, students will have the opportunity to fully prepare for Macro portion of the AP exam.

**Advanced Placement Microeconomics – SS05201** – 1 credit, second semester only course. AP level. Open to grades 11 and 12. Microeconomics will give students a thorough understanding of the principles of economics as applied to the individual as decision maker, consumer, and producer, within larger economic systems. The course will embed AP exam formats, evaluation of exam questions, use of AP rubrics and scoring systems. If they so choose, students will have the opportunity to fully prepare for Micro portion of the AP exam.

Course outcomes and expectations for both AP Economics courses are:

- Understand the “economic way of thinking” by systematic use of analytical decision making skills to discuss and solve problems
- Demonstrate the ability to understand and manipulate complex graphic models.
- Develop an understanding of the economic system which will enable them to take an active and informed role in the economic decisions in their own community and government
- Develop critical thinking skills that will enable the students to evaluate economic problems, analyze and determine points of view
- Apply economics to everyday situations
- Prepare to take AP exam

**Advanced Placement European History – SS05301** – 2 credit, year-long course, AP level. Open to grades 11 and 12. This course is an intensive study of European history from the Renaissance to the 1990s. Students are encouraged to take the Advanced Placement (AP) examination. Due to the extensive breadth and depth of content, the seminar will focus on the period from 1848 to present.
Course outcomes and expectations are:

- Demonstrate knowledge of basic chronology and the major events and trends from approximately 1450 to the present within the following themes: Intellectual and Cultural History; Political and Diplomatic History; Social and Economic History
- Interpret and analyze primary sources and monographs in relation to historical events
- Analyze and evaluate, in essay form, topics of major historical significance

**Advanced Placement Psychology – SS05501** – 1 credit, one semester course, AP level. Open to grades 11 and 12. This course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. *This course has a mandatory summer work component. Students are required to pick up the packet prior to their departure for summer vacation, and to return to school with the work completed.*

Course Outcomes and expectations are:

- Provide each student with a learning experience equivalent to that obtained in most introductory psychology courses
- This course has been specifically designed to help students successfully complete the AP exam.

[AP Psychology ~ Alternate Day – SS05551] – 1 credit, year-long every other day course, AP level. Same course description as above. This course was designed for music students but is an option for all juniors and seniors. Offered in odd years, e.g. 2013-14.]

**Psychology – SS05602** – .5 credits, one quarter course, college prep level. Open to grades 11 and 12. This course is an introduction to the various types of psychology. The application of course understandings allows students to relate key concepts to the interpretation of their own behavior and that of others. Topics include the history of psychology, human development, personality, conscience and the process of learning. *This course is not appropriate for students who have completed AP Psychology (SS05501).*

Course outcomes and expectations are:

- Discuss and analyze topics related to the course
- Analyze primary sources including film
- Complete a dream analysis journal
- Complete a research project within the field of psychology.

[Psychology ~ Alternate Day – SS05652] – .5 credits, one semester every other day course, college prep level. Same course description as above. This course was designed for music students but is an option for all juniors and seniors.]

**Criminal Justice System – SS05800** – .5 credits, one quarter course, unleveled. Open to grades 10, 11 and 12. This is an introductory course to the Criminal Justice System in the United States. The course will include speakers from various fields in Criminal Justice, class discussion regarding current events, field simulations and class notes. Topics will include, but are not limited to: federal and state systems, victims of crime, the Juvenile Justice System, debate on the death sentence, serial killers and profiling, and law enforcement.
Global Conflicts in the Modern World – SS05900 – .5 credits, one quarter course, un leveled. Open to students in grades 10, 11 and 12. Students study the workings of global politics in the modern world, exploring the causes of conflicts and crises in both domestic and foreign domains. The strategies, goals, tactics, and motivations of groups involved in revolutions, rebellions, and acts of terrorism are explored. Students are expected to examine political philosophies as well as propose solutions to many global political issues.

Course outcomes and expectations are:

- Demonstrate an understanding of names, terms, and concepts relating to global conflicts by completing a final project
- Demonstrate the ability to use research methods by examining web sites on the internet and reporting findings to the class
- Demonstrate persuasive writing skills by writing an editorial about a current controversial global issue
- Demonstrate knowledge of current affairs by maintaining a portfolio of current news events
- Demonstrate communication skills by actively participating in class debates and discussions

[Global Conflicts in the Modern World ~ Alternate Day – SS05950 - .5 credits, every other day for one semester. Same course description as above. This course is designed for music students but is an option for all students in the 10th, 11th, and 12th grades.]

Minority Studies – SS06000 – .5 credits, one quarter course, un leveled. Open to students in grades 10, 11, and 12. An opportunity to learn about the perceptions and concerns of others is provided in this course. Students will study the effects of conflict and struggle within society caused by these differing perceptions, and will practice ways of dealing with or resolving conflicts in a non-violent manner.

Course outcomes and expectations are:

- Demonstrate proficiency in explaining various aspects of prejudice and discrimination in written and oral formats
- Prepare three “free-response” journals
- Examine a poem and/or a song demonstrating racial inequality
- Prepare a group presentation expanding upon a particular area of racism or discrimination.
- Complete reading of selected materials

20th Century Pop Cultures – SS06100 – .5 credits, one quarter course, un leveled. Open to grades 10, 11 and 12. This course is designed to help students identify deeply held cultural values expressed throughout Popular Culture. By analyzing popular TV, movies, music, fashion, youth culture and advertising from the 20th and 21st centuries, students will come to recognize these important values, their historical foundations, as well as how the profit orientation of American society creates the context for all pop cultural expressions.

Course outcomes and expectations are:

- Analyze primary sources including film, music, ads and TV shows, demonstrating an understanding of the cultural values expressed in these sources
- Analyze primary sources including film, music, ads and TV shows demonstrating an understanding of the historical influences upon modern popular culture
- Complete a journal analyzing and reflecting upon various popular cultural artifacts
- Complete a historical and evaluative research project on a pop culture icon
Sociology – SS06200 – .5 credits, one quarter course, unlevelled. Open to grades 11 and 12. This sociology elective is designed to increase student knowledge of human social interaction. Students study the role of individuals and groups in society, while developing an understanding of social interactions and analyzing solutions to social problems.

Course outcomes and expectations are:

- Demonstrate an understanding of sociological theories and vocabulary
- Complete both oral and written class projects
- Examine social issues using current information found in newspapers, in magazines and on the internet
Special Education Department

Students enroll in courses offered by the Special Education Department per the consensus of their Individualized Education Program (IEP) team. Only eligible students may enroll in courses offered by the department and furthermore may only register for specific courses with the endorsement of each student’s case manager, guidance counselor, and grade-level administrator. All course enrollments are subject to review and audit by the Office of Secondary Special Programs.

The Special Education Department offers core replacement (supplemental level) courses in two of the four major subject areas (i.e., English & Mathematics) as well as specific courses in instructional support, emotional support, and skills support.

Through the IEP team process, families and students collaborate with professionals from the Office of Secondary Special Programs to discuss suitable courses of study; design annual goals that meet the unique learning needs of the student, and craft an appropriate transition plan which promotes progress towards graduation.

English 9 & 10 (Supplemental Level) – EN00090/EN00100 (2.0 credit, year-long courses): These are core replacement courses for regular education English at the equivalent grade-levels and most students complete both EN00090 & EN00100 in consecutive years for continuity as well as to ensure the full scope of sequence of grade-level anchors are reviewed. Students who enroll in this course sequence are working in mixed grade-level groups of students with similar learning profiles. These courses provide for both exposure to grade-level concepts as well as provide for continued development of fundamental literacy skills. This course sequence emphasizes: literature, writing, oral comprehension, spelling, and reading comprehension.

Course outcomes and expectations are:
- Develop functional reading skills through direct instruction in reading accuracy (decoding), fluency and comprehension
- Develop an ability to complete various writing samples using the RACER concept
- Learn and apply the essentials of research citations using the Modern Language Association (MLA) format
- Demonstrate an ability to write a thesis-based research report
- Demonstrating an understanding of correct structure, mechanics and usage in writing
- Apply technology as it relates to the Chrome Book in the classroom
- Develop public speaking skills
- Use a thematic approach to discuss literature

Selected texts: Students will read at least one novel of their choice, per year, in addition to the required readings for the course sequence. *These courses do not currently meet NCAA eligibility standards for English credit.

English 11 & 12 (Supplemental Level) – EN00110/EN00120 (1.0 credit, semester courses): These are core replacement courses for regular education English at the equivalent grade-levels and most students complete both EN00110 & EN00120 in consecutive years for continuity as well as to ensure the full scope of sequence of grade-level anchors are reviewed. Students who enroll in this course sequence are working in mixed grade-level groups of students with similar learning profiles. These courses provide for exposure to grade-level concepts, as well as provide for continued development of fundamental literacy skills. This course sequence emphasizes the practical application of: reading, writing, research, and study skills.
Course expectations and outcomes are:

- Develop functional reading skills through direct instruction in reading accuracy (decoding), fluency and comprehension
- Develop an ability to complete various writing samples using the RACER concept
- Apply technology to assist in research
- Develop vocabulary skills in conjunction with reading/writing assignments
- Develop comprehension skills through reading works of drama and fiction and completing “Chapter Summaries” and other curriculum based assessments
- Complete a formal research paper including note cards, visual aids and citations
- Apply a thematic approach to literature discussion
- Apply public speaking skills when working in cooperative learning groups and to make oral presentations to small groups

Selected texts: Students will read at least one novel of their choice, per year, in addition to the required readings for the course sequence. *These courses do not currently meet NCAA eligibility standards for English credit.

**English I & II – EN00010/EN00020** (1.0 credit, year-long courses): This course sequence is designed to infuse Pennsylvania’s Standards Aligned System: Curriculum Framework with individual student needs to further develop academic literacy skills (e.g., expository vocabulary, content area reading comprehension, reading fluency, and written expression) through an intensive instructional approach in a small-group setting. Students who enroll in this sequence are working in mixed grade-level groups of students with similar developmental needs and whose transition plans are more focused on employment (supported or unsupported) opportunities rather than immediate post-secondary education programs. These courses run parallel to Academic Mathematics I & II (Supplemental Level) and are scheduled during the same academic blocks. Students who register for EN04100/EN04200 must also enroll in MA04100/MA04200 in congruent terms. Students will split their assigned academic block between both courses according to their individual instructional needs. It is highly recommended that students complete four consecutive semesters of this course sequence before progressing to EN04300 & EN04400. *These courses do not currently meet NCAA eligibility standards for English credit.

**English III & IV – EN00030/EN00040** (1.0 credit, year-long courses): This course sequence is designed to build upon successful completion of Academic English II (Supplemental Level) as well as meet individual student needs by aligning Pennsylvania’s Standards and Eligible Content for English curricula with direct instruction in fundamental literacy skills (e.g., vocabulary application, reading for content, and writing for the workplace) through a cooperative instructional approach in a small group setting. Students who enroll in this sequence are focused on practical applications, including but not limited to: resume development, composing business letters, appropriate grammar application in the workplace, personal essays, public speaking and interpersonal communication skills, independent word processing, and refinement of critical thinking skills in a professional capacity. Students who enroll in EN04300/EN04400 have transition plans focused on immediate employment (supported or unsupported) opportunities upon graduation. These courses run parallel to Academic Mathematics III & IV (Supplemental Level) and are scheduled during the same academic blocks. Students who register for EN04300/EN04400 must also enroll in MA04300/MA04400 in congruent terms. Students will split their assigned academic block between both courses according to their individual instructional needs. *These courses do not currently meet NCAA eligibility standards for English credit.*
Mathematics 9 (Supplemental Level) – MA00090 (2.0 credit, year-long courses): These are core replacement courses for regular education Mathematics at the equivalent grade-levels and most student complete both MA00090 & MA00100 in consecutive years for continuity as well as to ensure the full scope of sequence of grade-level anchors are reviewed. Students who enroll in this course sequence are working groups of students with similar learning profiles. These courses provide for both exposure to grade-level concepts as well as provide for continued development of fundamental mathematics skills. This course sequence emphasizes: math fluency and problem solving skills, data interpretation, integer operations & graphing equations, probability, fractions, algebraic sentences & solving equations. *These courses do not currently meet NCAA eligibility standards for Mathematics credit.

Mathematics 10 (Supplemental Level) – MA00100 (2.0 credit, year-long courses): These are core replacement courses for regular education Mathematics at the equivalent grade-levels and most student complete both MA00090 & MA00100 in consecutive years for continuity as well as to ensure the full scope of sequence of grade-level anchors are reviewed. Students who enroll in this course sequence are working in groups of students with similar learning profiles. These courses provide for both exposure to grade-level concepts as well as provide for continued development of fundamental mathematics skills. This course sequence emphasizes: math fluency and problem solving skills, ratios & proportions, division of fractions, percent formula, Pythagorean Theorem, volume & surface area formulas, slope & rate of change, exponents & scientific notation. *These courses do not currently meet NCAA eligibility standards for Mathematics credit.

Mathematics 11 & 12 (Supplemental Level) – MA00110/MA00120 (1.0 credit, semester courses): These are core replacement courses for regular education Mathematics at the equivalent grade-levels and most student complete both MA00110 & MA00120 in consecutive years for continuity as well as to ensure the full scope of sequence of grade-level anchors are reviewed. Students who enroll in this course sequence are working in mixed grade-level groups of students with similar learning profiles. These courses provide for both exposure to grade-level concepts as well as provide for continued development of fundamental mathematics skills. This course sequence emphasizes: math fluency and problem solving skills, numbers and operations, measurement, algebraic concepts, geometry, data analysis and probability. *These courses do not currently meet NCAA eligibility standards for Mathematics credit.

Mathematics I & II – MA00010/MA00020 (1.0 credit, year-long courses): This course sequence is designed to infuse Pennsylvania’s Standards Aligned System: Curriculum Framework with individual student needs to further develop academic mathematics skills through an intensive instructional approach in a small-group setting. Students who enroll in this sequence are working in mixed grade-level groups of students with similar developmental needs and whose transition plans are more focused on employment (supported or unsupported) opportunities rather than immediate post-secondary education programs. These courses run parallel to Academic English I & II and are scheduled during the same academic blocks. Students who register for MA04100/MA04200 must also enroll in EN04100/EN04200 in congruent terms. Students will split their assigned academic block between both courses according to their individual instructional needs. It is highly recommended that students complete four consecutive semesters of this course sequence before progressing to MA04300 & MA04400. *These courses do not currently meet NCAA eligibility standards for Mathematics credit.
**Special Education**

**Mathematics III & IV – MA00030/MA00040** (1.0 credit, year-long courses): This course sequence is designed to infuse Pennsylvania’s *Standards Aligned System: Curriculum Framework* with individual student needs to further develop academic mathematics skills through an intensive instructional approach in a small-group setting. Students who enroll in this sequence are working in mixed grade-level groups of students with similar developmental needs and whose transition plans are more focused on employment (supported or unsupervised) opportunities rather than immediate post-secondary education programs. Students who enroll in MA04300/MA04400 have transition plans focused on immediate employment (supported or unsupervised) opportunities upon graduation. These courses run parallel to *Academic English III & IV* and are scheduled during the same academic blocks. Students who register for MA04300/MA04400 must also enroll in EN04300/EN04400 in congruent terms. Students will split their assigned academic block between both courses according to their individual instructional needs.

*These courses do not currently meet NCAA eligibility standards for Mathematics credit.*

**Academic Support (A/B) – MI00055/MI00065** (0.50 credit, semester course, alternating day schedule): This course is designed for students with either Individual Education Programs (IEP) or Chapter 15 Service Agreements (504 Accommodations Plan) to support progress in the general education curriculum. Students specifically focus on executive functioning skills (e.g., organization, long-term planning, processing, etc.), study skills, and test-taking skills. This service must be described in either the IEP or 504 Accommodations Plan, and students can only enroll in this course as a result of an IEP team, or multidisciplinary team, decision. Students can enroll in this course for one or both semesters. This course runs on an alternating day schedule, opposite of study hall, throughout the semester(s) in which it is scheduled.

**Academic Support I – MI00155/MI00165** (1.0 credit, semester course): This course is designed for students with Individual Education Programs (IEP) to support progress in the general education curriculum. Students specifically focus on executive functioning skills (e.g., organization, long-term planning, processing, etc.), study skills, and test-taking skills as well as receive direct, remedial instruction in one of the two primary academic areas (i.e., literacy, mathematics). This service must be described in student’s IEP, and students can only enroll in this course as a result of an IEP team decision. Students who enroll in this course split their assigned support block with direct instruction in either remedial literacy or mathematics, per their IEP.

**Academic Support II – MI00200** (2.0 credit, year-long course): This course is designed for students with Individual Education Programs (IEP) to support progress in the general education curriculum. Students specifically focus on executive functioning skills (e.g., organization, long-term planning, processing, etc.), study skills, and test-taking skills as well as receive direct, remedial instruction in both primary academic areas (i.e., literacy, mathematics). This service must be described in the student’s IEP, and students can only enroll in this course as a result of an IEP team decision. Students who enroll in this course split their assigned support block with direct instruction, in literacy and mathematics, on an alternating schedule throughout the school year.

**Emotional Support – MI02000** (2.0 credit, year-long course): This course is designed for students with Individual Education Programs (IEP) to support their social and emotional development as well their general progress in the general education curriculum. Students specifically focus on processing and coping skills through individual and small-group work. This service must be described in the student’s IEP, and students can only enroll in this course as a result of an IEP team decision. Students who enroll in this course receive weekly small-group counseling services and have an opportunity to receive individualized counseling, per their IEP. Students who enroll in this course also work toward incentives via small group and or individualized positive behavior support plans.
Social Thinking & Skills Support – MI03000 (2.0 credit, year-long course): This course is designed for students with Individual Education Programs (IEP) to support their social awareness and general functionality across wider social environments. Students specifically receive direct instruction in a therapeutic, small group setting to further develop their application of social skills in post-secondary situations. Students who enroll in this course split their assigned block with social skills instruction and academic support. This service must be described in the student’s IEP, and students can only enroll in this course as a result of an IEP team decision. Students who enroll in this course receive daily, small group social skills instruction.

Life Skills Support – LS08000 (2.0 - 8.0 credits, year-long course): This course sequence is designed for students with Individual Education Programs (IEP) to support further development of functional literacy, mathematics, writing, vocational skills, independent living skills, and social skills. Most students who enroll in this course sequence do so to replace grade-level, core course (i.e., English, Mathematics, Social Studies, Science) requirements; however, when appropriate, students may be placed into regular education or supplemental (core) replacement courses per the consensus of the IEP team. Students complete functional coursework in all four core content areas, participate in community-based instruction, are provided opportunities for supported vocational training and programs, and strengthen critical independent living and vocational skills needed to become productive and responsible citizens.
Technology Education Department

The technology education curriculum is designed to provide a balanced mix of theoretical and practical knowledge with an abundant amount of hands-on activities included to reinforce conceptual understanding. The intent is to take advantage of the students' interest in discovering, creating, problem solving, and constructing, with a variety of tools, machines, materials, and processes. The long term goal of technology education is to promote technological literacy as a basic focal point in the general education of all individuals. This type of education will provide students with basic understandings and skills (literacy) needed to function effectively in a technological world.

Course Descriptions

Introduction to Practical Woodworking – TE01000 – .5 credits, one quarter course, unleveled. Open to all grades. *No prerequisite.* This course provides basic technical knowledge of basic woodworking material technology, including both instruction and project work. Students will learn safe and efficient operation of hand and machine tools. The course provides career information and a basic background in a variety of related fields. Students gain insight into avocation and vocational choices and may better select more specialized courses within the woodworking area. The material technology of woodworking will be introduced after thorough safety instruction. This course will allow students to work in several technologies. The proper technical language will be introduced and used exclusively. An understanding and development of project plans will begin the class. Students work on two projects. Assignments are performed in the classroom with few out of class work.

Course outcomes and expectations are:

- Demonstrate use and maintenance of basic woodworking equipment
- Design a project with an understanding of plan reading and development
- Demonstrate safe and proper use of all equipment through testing
- Develop individual drawings and cost/material sheets
- Organize a notebook of all plans, procedures, and handouts/homework
- Demonstrate effective and safe use of materials and equipment and proper maintenance of facilities

Introduction to Cabinet and Furniture Making – TE01100 – .5 credits, one quarter course, unleveled. Open to students in grades 10, 11 and 12. *Prerequisites: Students must have passed Practical Woodworking.* This course provides technical knowledge in basic and advanced furniture and cabinet making techniques and procedures. Relationships to industrial processes, careers, and related technologies are examined. A series of technical problem-solving techniques are used to complete project work. Research and development work is done in plan development, project improvement, cost estimating, and in an examination of the history of the processes being utilized. The correct technical language of this material technology is used. Students build on previously learned skills in the practical woodworking class. The mastery of advanced technological processes and the ability to problem solve and communicate technically help all students excel in our technological society. Assignments completed in class with minimal outside work.
Course outcomes and expectations are:

- Demonstrate use and maintenance of basic and advanced woodworking machines
- Design a woodworking project utilizing advanced joinery techniques
- Develop plans including price and material calculations as well as all parts and accessories
- Demonstration of the proper use of all equipment along with an understanding of all safety procedures must be demonstrated
- Individual drawings and cost/material sheets
- Organize a notebook of all processes learned, plan development, and handouts/homework
- Effective and safe use of materials and equipment and proper maintenance of all facilities

**Introduction to Maintenance and Repair** – TE01200 – .5 credits, one quarter course, **unleveled**. Open to all grades. **No prerequisite.** This course provides technical knowledge of home or apartment maintenance and repairs. The students develop basic skills and an understanding of machinery and techniques utilized in industry. Activities include instruction in plumbing, electricity, masonry, carpentry, painting and paperhanging. Class work involves lecture, demonstrations, films; and students have several projects. All class work begins with a reading and understanding of basic plans of houses. The correct technical language of these related technologies will be used. Students move through basic house blueprints, design improvements to structures and practice basic maintenance techniques. Students use various tools and techniques to maintain and improve their own surroundings. All techniques will be used after a proper safety understanding has been demonstrated. Most assignments are completed in class with some outside work.

Course outcomes and expectations are:

- Demonstrate the use and maintenance of basic and advanced home maintenance and repair techniques
- Design a structure and all aspects of its construction
- An understanding of all techniques will be demonstrated or used in project work after a safety lecture
- Examine all industrial careers related to the techniques will be discussed and an understanding of all costs will be examined
- Individual drawings and cost estimating
- Organize notebook and plans
- Demonstrate effective and safe use of materials and equipment

**Introduction to Manufacturing Technology** – TE01300 – .5 credits, one quarter course, **unleveled**. Open to all grades. **No prerequisite.** This course allows students to analyze organization and ownership of their own company, including research and development, finance, and production of a product, as well as industrial relations, and marketing concepts and concepts as they relate to the manufacture of consumer and industrial products in the technology laboratory. All aspects of machine use are thoroughly tested for safety and understanding. The correct technical language will be utilized in all classroom lecture and discussion. The manufacturing system will be examined and utilized in a project to be sold. The students design all aspects of project development.

Assignments include: safety exam, project development packet, prototype, and production run and sale.
Course outcomes and expectations are:

- Demonstrate the safe and proper use of all equipment used
- Complete all aspects of design from thumbnail sketches through final plan and ending with production run and sale
- Follow a sequence of specific technical student development to develop a product
- Complete individual project development packet
- Organize notebooks
- Complete production run and prototype craftsmanship

[Introduction to Manufacturing Technology (Alternate Day) – TE01350 – .5 credits, every other day for one semester, unleveled. This course is designed for students in the music program but is an option for all students.]

Computer Aided Manufacturing – TE01700 – .5 credits, one quarter course, unleveled. Open to all grades. The computer aided manufacturing course is a innovative class built around technology and the design process. Students will use their creativity to design and build wood projects and incorporate parts manufactured on the AXYZ CNC router. Students will use EnRoute, AutoCAD and other graphic design software to create parts to incorporate into their projects. Students will also utilize traditional tools, machines, and finishing techniques to complete their final wood projects.

Course outcomes and expectations are:

- Demonstrate the safe and proper use of all equipment used
- Complete all aspects of design from thumbnail sketches through final plan and ending with production run
- Complete production run and prototype craftsmanship

Technical Drawing Courses

These three technical drawing courses will guide students through different drafting techniques from fundamental skills and processes through Computer Aided Drafting (CAD) and into the world of animation. Each course has been carefully prepared to give students a very personal feel with blend of all tools of many professions. Students will learn to visualize in both 2-D and 3-D, animate concepts and designs, develop and strengthen their technical imagination, to think precisely, and learn to read and write in the language of industry, drafting.

Introduction to Mechanical Drawing and CAD – TE01400 – 1 credit, one semester course, unleveled. Open to all grades. No prerequisite. Introduction to Mechanical Drafting and CAD lays out the groundwork for skills a student might need who is interested in engineering, architecture, industrial design, interior design, tool design, model makers, CNC machining, technical illustrators, artists, computer animation and film ...just to name a few. Throughout this class, students will be challenged to learn the use of different drafting tools and techniques involved in the world of industry. Although the class begins with hand drafting by pencil and other tools, it transitions to computer, giving the students a better feel for what is being used in today's cutting edge applications. The final CAD and drafting work will be to produce a set of drawings for a furniture design project, the entertainment center. This design project ties all their newly developed design skills together with a design project of their own.
Course outcomes and expectations are: (these apply to both manual skills and CAD skills)

- Demonstrate the use and care of all drafting equipment
- Create thumbnail sketches and produce both pencil and CAD drawings that meet ANSI standards
- Apply the acceptable set up and format of professional presentation
- Master the principles of orthographic projection, oblique and isometric drawings
- Demonstrate the ability to visualize in three dimensions and create CAD based solid models
- Build skills upon both individual and cooperative-team work with class
- Organize a portfolio of concepts discussed during class and from textbook readings and assignments
- Assignments evaluated for completeness and understanding
- Apply the concepts and steps of a “design brief” as it relates to getting a design off the ground
- Gain an understanding of how from pencil sketching to CAD and the animation process impact on the visualization of a concept

**Architectural Computer Aided Drafting** – TE01500 – 1 credit, one semester course, **unleveled**. Open to all grades. **Prerequisite: Introduction to Mechanical Drawing with a grade of "C" or better.** Open to all students. Prepares students for a technical career in engineering, architecture, industrial design, interior design, model makers, technical illustrators, artists, computer animation and film ..just to name a few. The class will focus on the solid modeling of a residence and from this model produce a full set of architectural plans including kitchen renderings, walk through animations and a hand built ¼ scale model. This course is completely computer based though the model will be constructed by hand.

Course outcomes and expectations are:

- Participate in individual and cooperative-team work
- Organize a portfolio of concepts developed during class discussions and textbook readings
- Complete assignments that are evaluated for completeness and understanding
- Demonstrate effective use of drafting equipment and mechanical drawing principles
- Produce floor plans, elevations, door and window schedules, stair/wall section/fireplace details, electrical plan, site plan, kitchen perspectives and renderings, animate full motion walk through and a ¼ scale model
- Create thumbnail sketches and produce both pencil and CAD drawings that meet ANSI standards
- Apply the acceptable set up and format of professional presentation
- Master the principles of animating walk-throughs
- Build skills upon both individual and cooperative-team work with class
- Assignments evaluated for completeness and understanding

**Advanced Computer Aided Drafting & Design (CADD)** – TE01600 – 1 credit, one semester, **unleveled**. Open to all grades. **Prerequisite: Introduction to Mechanical Drawing with a grade of "C" or better.** This course is for students interested in engineering, architecture, industrial design, interior design, tool design, model makers, CNC machining, technical illustration, artists, computer animation, film ..just to name a few.
Course outcomes and expectations are:

- Participate in individual and cooperative-team work with class
- Organize a notebook of concepts developed during class discussions and textbook readings
- Complete assignments that are evaluated for completeness and understanding
- Demonstrate effective use of computer equipment and mechanical drawing principles
- Apply geometric construction principals to design
- Use the CNC machine to manufacture parts and understand the connection between the CAD drawn components to the application to the CNC process
- Apply advance solid modeling techniques
- Produce high quality renderings and animations
- Demonstrate the use and care of all drafting equipment
- Create thumbnail sketches and produce both pencil and CAD drawings that meet ANSI standards
- Apply the acceptable set up and format of professional presentation
- Master the principles of geometric construction
- Demonstrate an advanced ability to visualize in three dimensions and create CAD based solid models
- Build skills upon both individual and cooperative-team work with class
- Organize a portfolio of concepts discussed during class and from textbook readings and assignments
- Assignments evaluated for completeness and understanding
- Apply the concepts and steps of a “design brief” as it relates to getting a design off the ground
- Gain an understanding of how pencil sketching to CAD to the animation process impacts on the art of the visualization of a concept
World Language Department

The mission of the World Language Department is to prepare students for citizenship in a multi-cultural, multi-lingual global community. The department promotes proficiency in languages along with knowledge of cultures and literature. Our teachers seek to give students a greater understanding of world affairs, an enhanced knowledge of the traditions, achievements, and lifestyles of the international community, and an appreciation of differences and similarities among peoples and nations.

Outcomes in World Language Study

Why is World Language study your passport to opportunity? As a Haverford world language student, you will be able to achieve the following outcomes:

- Acquire a multicultural perspective
- Facilitate entrance into college
- Strengthen one’s potential in today’s competitive job market
- Become a functional member of the global community
- Increase SAT scores
- Travel the world

In addition, world language students will be able to:

- Display knowledge of areas and cultures of the world where the target language is spoken
- Communicate across cultures in the 4 skills of language learning: listening, speaking, reading, and writing
- Demonstrate awareness of the intellectual, artistic, and literary contributions of target cultures

**The Haverford High School World Language program is comprised of sequential courses with prerequisites. Unless otherwise noted, it is strongly recommended that a prerequisite course be successfully completed with a minimum grade of “B” in honors and a minimum grade of “C” in college prep before a student continues with the next course at the same level.** Any student following the honors track not meeting this prerequisite may continue with the next course in the sequence but at a lower level. Any student who does not meet the prerequisites should have a discussion with his/her teacher to determine the next course to be taken. These prerequisites are necessary to provide the student with the opportunity to develop a proficient understanding of the concepts and skills needed for mastery of the language. To assist our students with their selections, serious consideration should be given to teacher recommendation regarding the next World Language course to be scheduled. **NOTE- Middle School first year language courses and High School first year language courses are the exact same courses.**

First Year Course Outcomes

For French, Italian and Spanish

- Comprehend orally simple questions, statements, messages, expressions of courtesy, and other brief information regarding time, place, directions, and commands
- Perform simple social interactions, answer simple questions, make brief statements regarding self and environment and obtain information using learned phrases
- Comprehend in written form: signs, directions, parts of formatted authentic documents, short, personal, informative, descriptive correspondence and narratives
- Write short, informative, descriptive paragraphs, fill out basic forms, write short messages, and obtain information via short questions with accuracy in grammar and spelling
- Demonstrate an evolving awareness of the culture of the target countries
Second Year Course Outcomes
For French, Italian and Spanish

- Begin to comprehend speech on familiar topics at normal speed including social interactions, questions, statements, directions, and expressions of courtesy
- Be able to tend to one’s welfare in the target language using learned material with emerging spontaneity in both the present and the past
- Be able to read and understand authentic materials e.g. menus, schedules; brief correspondence; lengthier narratives in the present and past
- Write short documents dealing with forms, basic needs, self and environment, and structured questions from which information will be obtained with accuracy in grammar and spelling
- Demonstrate an awareness of basic social formulae, customs, traditions, and cultural situations of everyday life

Third Year Course Outcomes
For French, Italian and Spanish

- Understand spoken information with regard to different time frames: present, past and future as well as the sequence of events
- Generate orally more detailed statements, questions, comments, preferences with spontaneity and authenticity
- Be able to read and understand short stories, cultural information, formatted documents and to infer sequence from context
- Be able to write social correspondence, information about self and environment in paragraph form, and take notes on oral or written discourse on familiar topics with accuracy in grammar and spelling
- Demonstrate a more in-depth awareness of the countries where the target language is spoken

Fourth Year Course Outcomes
For French, Italian and Spanish

- Comprehend most speech on familiar topics, more detailed information with regard to different time frames and reply with more precision
- Describe orally events with more attention to detail, sustain conversation on most familiar topics, and express and support opinions and beliefs
- Understand, in written form, main ideas and details, introductory poetry and literature, as well as historical and cultural events
- Write cohesive summaries of materials read, social correspondence, biographical and autobiographical information and take comprehensive notes with accuracy in grammar and spelling
- Demonstrate understanding of appropriate behavior in cultural situations and appreciation of the contributions made by target culture to other nations

Fifth Year Course Outcomes
For French, Italian and Spanish

- Comprehend most speech, including native speakers, in all contexts
- Sustain conversation, express and support opinions, refute an argument and report on current events
- Read and comprehend short novels, rules and instructions, more advanced poetry and literature, and authentic materials
- Write well-structured essays, analyses of literary works, formal correspondence, and autobiographical/biographical information with accuracy in grammar and spelling
- Understand the values, philosophy, idiomatic expressions, music, and art of the target culture
**World Language**

**ALL 1ST YEAR LANGUAGE COURSES ARE ONE SEMESTER IN LENGTH, 1.0 CREDIT. OPEN TO ALL STUDENTS IN ALL GRADES. NO PREREQUISITE.**

**ALL 2ND YEAR TO 5TH YEAR COURSES ARE ONE SEMESTER IN LENGTH, 1.0 CREDIT. OPEN TO ALL STUDENTS IN ALL GRADES. PREREQUISITE: THE PREVIOUS YEAR(S) OF THE LANGUAGE.**

**FRENCH COURSES**

**French I – WL01102 – 1 credit, one semester course, college prep level.** This course is an introduction to French language and culture. All materials used are student-oriented and relevant for communication when traveling in a French-speaking country. Students will have the opportunity to learn about cultural similarities and differences of people who speak the French language. Various readings, on line work and videos will supplement learning.

**TEXTBOOK:** T ’ES_B RANCHE series

**French II – WL01202 – 1 credit, one semester course, college prep level. It is strongly recommended that French I was completed with a minimum grade of a C to be successful in this course.** This course is a continuation of the first year’s outcomes of demonstrating proficiency in the skills of listening, speaking, reading and writing. There is a strong focus on the cultural aspects of the many countries in the French-speaking world. Students can look forward to a high level of participation in the learning process as they become involved in a variety of classroom activities. Various readings, on line work and videos will supplement learning.

**TEXTBOOK:** T ’ES_B RANCHE series

**French III (H) – WL01301 – 1 credit, one semester course, honors level. It is strongly recommended that French II was completed with a minimum grade of a B to be successful in this course.** In this course, there is a smooth transition to a more intense grammatical, verbal, and vocabulary development. French is spoken most of the time, with a high level of student participation. Cultural material is presented and discussed in the target language. Students are encouraged to use more free expression. Various readings, on line work and videos will supplement learning.

**TEXTBOOK:** T ’ES_B RANCHE series

**French IV (H) – WL01401 – 1 credit, one semester course, honors level. It is strongly recommended that French III (H) was completed with a minimum grade of a B to be successful in this course.** Students will review and refine previously learned material as well as study new structures. With this foundation plus additional vocabulary, students will be introduced to French literature in the study of LE PETIT PRINCE. This class is conducted in French. The essential range of grammar will be completed at this level. Various readings, on line work and videos will supplement learning.

**TEXTBOOK:** T ’ES_B RANCHE series / Le Petit Prince
AP French Language – WL01501 – 1 credit, one semester course, AP level. FIRST SEMESTER ONLY. *It is strongly recommended that French IV (H) was completed with a minimum grade of a B to be successful in this course.* This course serves as the first step of preparation for the French AP exam. Advanced grammatical structures and development of vocabulary will be mastered via literary selections and continued work in various texts. Speaking and listening skills will be enhanced through oral proficiency based activities and authentic materials. The class will be conducted entirely in French. **IT IS HIGHLY RECOMMENDED THAT ANY STUDENT WHO PLANS ON TAKING THE AP FRENCH LANGUAGE EXAM ALSO TAKES THE WORLD LANGUAGE SEMINAR IN THE SECOND SEMESTER.**

**TEXTBOOKS:** BARRON’S AP FRENCH, MAIGRET ET LE CLOCHARD, L ’ECOL E DES FOIS POUR TOUTES AND VARIOUS LITERARY EXCERPTS.

France and Modern Western Civilization (H) – WL01901 – 1 credit, one semester course, honors level. This course will allow students to experience the global impact of French history, literature, and art in the modern age: from the Age of Reason to the present. This multi-media course will feature selected readings from French literature and an analysis of the significant effects of the French language, cuisine, and fashion on the world. Topics covered will include – The Age of Reason, France in North America, the French Revolution, the Napoleonic Age, and modern Republican France. The extensive use of French cinema will allow the student to be immersed in the historical and cultural development of France.

**TEXTBOOKS:** TRESORS DU TEMPS, PETIT NICOLAS, SELECTED CONTEMPORARY AND HISTORICAL VIDEOS, ONLINE RESOURCES

**ITALIAN COURSES**

**Italian I** – WL02102 – 1 credit, one semester course, college prep level. This course is an introduction to Italian in which the students will be taught the four basic skills of listening, speaking, reading, and writing in order to form a solid foundation for future language study. Students will learn Italian which is necessary to communicate in authentic situations. This course represents a communicative approach to language study.

**TEXTBOOK:** ECCO! UNO

**Italian II** – WL02202 – 1 credit, one semester course, college prep level. *It is strongly recommended that Italian I was completed with a minimum grade of a C to be successful in this course.* After a rapid review of some basic grammar, the four skills are developed at a more intensive pace with a growing emphasis on Italian structure. Through presentations of skits and role-plays, students will communicate what they have learned.

**TEXTBOOK:** SUPERCIAO 1A

**Italian III (H)** – WL02301 – 1 credit, one semester course, honors level. *It is strongly recommended that Italian II was completed with a minimum grade of a B to be successful in this course.* This course continues the work accomplished in the first two years at a more accelerated pace. Students are encouraged to speak in the target language while developing a strong grammatical base. Various activities will enable the students to refine their skills as well as to explore the rich world of Italian culture. The class is conducted in Italian.

**TEXTBOOK:** SUPERCIAO 1B (first half)
**Italian IV (H) – WL02401** – 1 credit, one semester course, honors level. FIRST SEMESTER ONLY. *It is strongly recommended that Italian III (H) was completed with a minimum grade of a B to be successful in this course.* This course consists of an intensive grammar review, with emphasis on grammar for personal communication. The study of the Italian verbal system will be completed. Aspects of Italian culture will be discussed. The class will be conducted in Italian.

**TEXTBOOKS:**  
**SUPERCIAO 2 (second half)**

**Italian V (H) – WL02501** – 1 credit, one semester course, honors level. SECOND SEMESTER ONLY. *It is strongly recommended that Italian IV (H) was completed with a minimum grade of a B to be successful in this course.* This course is an introduction to various Italian literary genres. Students will have the opportunity to improve their oral skills as well as reading, writing and listening skills. The course is conducted entirely in Italian.

**TEXTBOOKS:**  
**SUPERCIAO 3**

**LATIN COURSES**

**Latin I – WL03102** – 1 credit, one semester course, college prep level. This course is an introduction to the language and culture of the ancient Romans. It emphasizes reading skills and provides, through its inflectional system, a unique insight into the nature of language. Word study, particularly of English derivatives, is a prominent feature of the course.

**TEXTBOOK:**  
**ECCE ROMANI** series

Course Outcomes
- Read silently and aloud for comprehension of simple Latin
- Demonstrate knowledge of vocabulary, basic inflectional systems, and syntax
- Research and present information on ancient Rome, its early history, and its influence on modern life (e.g. architecture, entertainment)
- Demonstrate a basic knowledge of selected classical myths and their influence
- Recognize Latin roots in English words

**Latin II – WL03202** – 1 credit, one semester course, college prep level. *It is strongly recommended that Latin I was completed with a minimum grade of a C to be successful in this course.* This course involves a more in-depth exploration of the structure of the language as well as a continuing emphasis on acquisition of vocabulary, reading skills, and English derivatives. Cultural topics include an in-depth study of the Julio-Claudian Emperors, Roman history and classical heroes.

**TEXTBOOK:**  
**ECCE ROMANI** series

Course Outcomes
- Read and understand increasingly more complex Latin
- Read familiar Latin aloud with accurate pronunciation, appropriate phrase grouping, voice inflection and expression
- Demonstrate an increased knowledge of vocabulary, inflectional systems, syntax, and English derivatives
- Investigate and explain the influence of Latin upon a modern field of study (e.g. science, music, law)
- Investigate selected facts of Roman history during the Empire
Latin III (H) – WL03301 – 1 credit, one semester course, honors level. It is strongly recommended that Latin II was completed with a minimum grade of a B to be successful in this course. Following a thorough grammar review, students will read and interpret the prose and poetry of selected Roman authors including Phaedrus and Ovid. Extensive reading is required in this course.

TEXTBOOKS: ECCE ROMANI series and selected Latin Literature.

Course Outcomes
- Read Latin aloud with accurate pronunciation, appropriate phrase grouping, voice inflection and expression
- Identify and analyze characteristic or noteworthy features of an author’s style, including use of word choice and placement, imagery, figures of speech, sound and metrical effects, as seen in specific passages
- Compare and contrast elements of the art, literature, mythology and philosophy of their own world with that of the ancient world
- Demonstrate a knowledge of the vocabulary, inflectional systems, and syntax appropriate to the authors they read

Latin IV (H) – WL03401 – 1 credit, one semester course, honors level. It is strongly recommended that Latin III was completed with a minimum grade of a B to be successful in this course. In this course, students will develop awareness of and a respect for the Latin language and Roman culture through advanced reading of authentic poetry and prose.

Course Outcomes
- Read Latin poetry aloud, demonstrating mastery of pronunciation, meter, and appropriate expression
- Demonstrate a knowledge of inflectional systems and syntax appropriate to the authors they read
- Translate previously prepared passages accurately
- Read and comprehend new material at sight
- Identify and analyze characteristic features of the poet’s style, including use of word choice and placement, imagery, figures of speech, sound and metrical effects, as seen in specific passages
- Analyze and discuss particular motifs or general themes in the authors’ works

Latin V (H) – WL03401 – 1 credit, one semester course, honors level. It is strongly recommended that Latin IV was completed with a minimum grade of a B to be successful in this course. In this course, students will develop awareness of and a respect for the Latin language and Roman culture through advanced reading of authentic poetry and prose.

Course Outcomes
- Read Latin poetry aloud, demonstrating mastery of pronunciation, meter, and appropriate expression
- Demonstrate a knowledge of inflectional systems and syntax appropriate to the authors they read
- Translate previously prepared passages accurately
- Read and comprehend new material at sight
- Identify and analyze characteristic features of the poet’s style, including use of word choice and placement, imagery, figures of speech, sound and metrical effects, as seen in specific passages
- Analyze and discuss particular motifs or general themes in the authors’ works
AP Latin: Vergil and Caesar – WL03601 – 1 credit, one semester course, honors level. *It is strongly recommended that Latin IV (H) was completed with a minimum grade of a B to be successful in this course.* Students read selections from Vergil’s Aeneid and Caesar’s Gallic Wars as preparation for the AP Latin exam. Students may opt not to take the AP Exam. In this course students will progress in their ability to read, translate, understand, analyze and interpret Latin. This course requires extensive reading.

- Demonstrate a thorough grasp of grammatical structures and vocabulary
- Gain an appreciation of the epic poetry of Vergil by translating the selections accurately and interpreting critically
- Become familiar with the meter, stylistic devices, and grammatical constructions found in the *Aeneid*
- Understand the major themes of the *Aeneid*, especially as they relate to the mythological and historical background against which the *Aeneid* was written
- To become familiar with the sequence of historical events as narrated by Julius Caesar in the *DBG* (*De bello Gallico*)
- To read and translate the Latin passages required by the College Board for AP Latin

**SPANISH COURSES**

Please note: Spanish II through Spanish V has two tracks. Your Spanish I teacher will recommend which Spanish track to pursue.

**Spanish I** – WL04102 – 1 credit, one semester course, college prep level. This course is an introduction to Spanish language and culture. Students will be able to converse in elementary Spanish, learn basic reading and writing skills, and will demonstrate knowledge of Spanish traditions and culture.

**TEXTBOOK:** REALIDADES series

**Spanish II (H)** – WL04201 – *It is strongly recommended that Spanish I was completed with a minimum grade of a B and a teacher recommendation is given to take this honors course.* This course stresses a multi-faceted approach to a hands-on, student-centered learning experience. There are many varied activities which permit the students to further develop their language skills. The rich world of Hispanic culture is explored. This is an Honors level course. Success on the final exam in both the written and the oral components is required for continuation at the Honors level.

**TEXTBOOK:** REALIDADES series

**Spanish II** – WL04202 – 1 credit, one semester course, college prep level. *It is strongly recommended that Spanish I was completed with a minimum grade of a C to be successful in this course.* This college prep course is communicative and student-centered, which allows the student to experience everyday situations in which he/she will utilize the four basic skills of language learning. Videos, readings, and cultural units will further enhance the student’s understanding of the Spanish-speaking world.

**TEXTBOOK:** REALIDADES series
Spanish III (H) – WL04301 – 1 credit, one semester course, honors level.  *Prerequisite: Successful completion of Spanish II (H) - a minimum grade of B is strongly recommended.* This course allows students to use their critical thinking skills to make cross cultural comparisons as they continue to explore the Spanish-speaking world. The focus is on achieving greater proficiency in listening, reading, writing, and speaking skills. Success on the final exam, in both the written and the oral components, is required for continuation in the Honors program.

**TEXTBOOK:**   REALIDADES series

Spanish III – WL04302 – 1 credit, one semester course, college prep level. *It is strongly recommended that Spanish II was completed with a minimum grade of a C to be successful in this course.* This course stresses a multi-faceted approach which enhances the student’s learning experience. There are many varied activities which permit the students to refine the language skills they have already developed. The rich world of Hispanic culture is explored in depth.

**TEXTBOOK:**   REALIDADES series

Spanish IV (H) – WL04401 – 1 credit, one semester course, honors level. *Prerequisite: Successful completion of Spanish III (H) - a minimum grade of B is strongly recommended.* This course encompasses previously learned vocabulary and grammatical structures and introduces more complex ways to express requests, future actions, and descriptions of events and people in the past. Students will continue to learn about the diverse Hispanic cultures and use their critical thinking skills to differentiate and make comparisons. This course is conducted in Spanish. Success on the final exam in both the written and the oral components is required for continuation in the Honors program.

**TEXTBOOK:**   REALIDADES series

Spanish IV – WL04402 – 1 credit, one semester course, college prep level. *It is strongly recommended that Spanish III was completed with a minimum grade of a C to be successful in this course.* This course continues a multi-faceted approach to learning language. Students further explore the Spanish-speaking world as well as improve their proficiency skills.

**TEXTBOOK:**   REALIDADES series

AP Spanish Language (H) – 1 credit, one semester course, AP level.  WL04501 – FIRST SEMESTER ONLY – *Prerequisite: Successful completion of Spanish IV (H) - a minimum grade of B is strongly recommended.* Along with the World Language Seminar (WL09001), this course serves as preparation for the Spanish AP exam. Advanced grammatical structures and development of vocabulary will be mastered via literary selections and continued work in various texts. Speaking and listening skills will be enhanced through oral proficiency based activities and authentic materials. **IT IS HIGHLY RECOMMENDED THAT ANY STUDENT WHO PLANS ON TAKING THE AP SPANISH LANGUAGE EXAM ALSO TAKES THE WORLD LANGUAGE SEMINAR IN THE SECOND SEMESTER.**

**TEXTBOOKS:**   REALIDADES series, Una Vez Mas, Triangulo, on line resources and teacher prepared material
Spanish V – WL04502 – 1 credit, one semester course, college prep level. *It is strongly recommended that Spanish IV was completed with a minimum grade of a C to be successful in this course.* Students will enhance their skills of listening, speaking, reading, and writing through various types of reading: historical and literary from the Hispanic world. More advanced grammar structures are presented. THIS COURSE IS NOT PREPARATION FOR THE AP EXAM.

**TEXTBOOK:** REALIDADES series

**OTHER COURSES**

World Language Seminar (H) – WL09001 – 1 credit, one semester course, honors level. SECOND SEMESTER ONLY. This seminar will reinforce all skills needed for success in World Language AP tests including grammatical practice, oral proficiency exercises, reading comprehension and listening skills. Authentic test materials and realia will be incorporated. It is strongly recommended that students planning to take the AP exam enroll in this seminar. Please note: There may be students from various languages all preparing for an AP exam in this class.

Course outcomes and expectations are:

- Review format and grading system of the AP exam
- Complete and evaluate previous AP exam questions using the AP rubric and scoring systems
- Write timed essays for practice in demonstrating the ability to formulate and support ideas utilizing documentary evidence
